LAURENTIAN BANK OF CANADA CONSOLIDATED FINANCIAL STATEMENTS

AS AT OCTOBER 31, 2011 AND 2010

These consolidated financial statements present a recent financial history of the financial condition, results of operations and cash flows of Laurentian Bank of Canada.

The accompanying notes include important disclosures that are useful in understanding the Bank's operations. They provide information on how amounts presented in the consolidated financial statements were determined, describe significant events or changes that affect these amounts and explain certain line items in the consolidated financial statements. They also include details about the financial results that are not shown in the body of the consolidated financial statements.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The consolidated financial statements of Laurentian Bank of Canada and the other financial information contained in the Annual Report have been prepared by management, which is responsible for the integrity and fairness of the financial information presented. The financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) pursuant to the requirements of the *Bank Act* and reflect amounts that must, of necessity, be based on the best estimates and judgment of management. The financial information presented in the Annual Report is consistent with that in the financial statements.

Management is responsible for the implementation of the financial information accounting systems, which support, among others, the preparation of financial statements in accordance with Canadian GAAP. In discharging its responsibilities, management maintains the necessary internal control systems designed to provide assurance that transactions are properly authorized, assets are safeguarded and proper accounting records are held. The controls include, among other things, quality standards in hiring and training of employees, written policies, compliance with authorized limits for managers, procedure manuals, a corporate code of conduct, budgetary controls and appropriate management information systems.

The internal control systems are further supported by a regulatory compliance function, which ensures that the Bank and its employees comply with all regulatory requirements, as well as by a function of integrated risk management and an operating risk management function that ensures proper risk control, related documentation and the measurement of the financial impact of risks. In addition, the internal auditors periodically assess various aspects of the Bank's operations and make recommendations to management for, among other things, improvements to the internal control systems.

Every year, the Office of the Superintendent of Financial Institutions Canada makes such examinations and inquiries as deemed necessary to satisfy itself that the Bank is in a sound financial position and that it complies with the provisions of the *Bank Act*, particularly those regarding the safety of the depositors and shareholders of the Bank.

Ernst & Young LLP, independent auditors, appointed by the shareholders, audit the Bank's consolidated financial statements and their report follows.

The internal auditors, the independent auditors and the Superintendent of Financial Institutions Canada meet periodically with the Audit Committee, in the presence or absence of management, to discuss all aspects of their duties and matters arising therefrom.

The Board of Directors is responsible for reviewing and approving the financial statements and management's discussion and analysis of results of operations and financial condition appearing in the Annual Report. It oversees the manner in which management discharges its responsibilities for the preparation and presentation of the consolidated financial statements, the maintenance of appropriate internal controls and risk management, as well as the assessment of significant transactions through its Audit Committee and its Risk Management Committee. Both Board committees are composed solely of directors who are not officers or employees of the Bank.

RÉJEAN ROBITAILLE President and Chief Executive Officer MICHEL C. LAUZON Executive Vice-President and Chief Financial Officer

Montréal, Canada December 7, 2011

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF LAURENTIAN BANK OF CANADA

We have audited the accompanying consolidated financial statements of Laurentian Bank of Canada ("the Bank") which comprise the consolidated balance sheet as at October 31, 2011 and 2010, and the consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Bank as at October 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

October 31, 2011 and 2010 (All tabular amounts are in thousands of dollars, unless otherwise indicated.)

1 GENERAL

Laurentian Bank of Canada and its subsidiaries ("Laurentian Bank" or the "Bank") provide banking services to individuals and small and medium-sized enterprises, as well as to independent advisors across Canada, and operate as a full-service brokerage firm. The Bank is a chartered bank under Schedule 1 of the *Bank Act* (Canada) and has its head office in Montréal, Canada. The common shares of Laurentian Bank (stock symbol: LB) are listed on the Toronto Stock Exchange.

2 BASIS OF PRESENTATION

The consolidated financial statements of the Bank have been prepared in accordance with the *Bank Act*, which states that, except as otherwise specified by the Office of the Superintendent of Financial Institutions Canada (OSFI), the financial statements are to be prepared in accordance with Canadian generally accepted accounting principles (GAAP). These financial statements are in accordance with GAAP.

Certain comparative figures have been reclassified to conform to current year presentation.

2.1 BASIS OF CONSOLIDATION

The consolidated financial statements include the assets, liabilities and results of operations of the Bank and all of its subsidiaries after elimination of intercompany balances and transactions.

The Bank also consolidates variable interest entities (VIEs) when it is the primary beneficiary. Generally, VIEs are entities that are subject to control on a basis other than ownership of voting interests. The primary beneficiary is the enterprise that has the variable interests that will absorb the majority of expected losses or receive the majority of residual returns, as defined. Variable interests are defined as contractual, ownership or other financial interests in an entity that change with fluctuations in the entity's net asset value.

2.2 FUTURE ACCOUNTING POLICY CHANGES

Business combination

On January 5, 2009, three new sections of the *CICA Handbook* were issued: Section 1582, *Business Combinations*, Section 1601, *Consolidated Financial Statements*, and Section 1602, *Non-controlling Interests*. These new standards replace Section 1581, *Business Combinations* and Section 1600 *Consolidated Financial Statements* and would have been effective for the Bank on November 1, 2011 under current Canadian GAAP. Earlier adoption was permitted provided that all three sections were adopted at the same time. However, the Bank has not elected to early adopt these new sections.

The new recommendations in Section 1582 require measuring business acquisitions at the fair value of the acquired business, including the measurement at fair value of items such as non-controlling interests and contingent payment considerations. Also, the previously unrecognized future income tax assets related to the acquiree subsequent to the business combination are recognized in the consolidated statements of income rather than as a reduction in goodwill. In addition, business acquisition related costs are expensed as incurred.

Section 1601 establishes standards for the preparation of consolidated financial statements and is aligned with the corresponding provisions of Section 1600.

Section 1602 establishes standards for accounting for non-controlling interests in a subsidiary subsequent to a business combination.

International Financial Reporting Standards

In February 2008, the Accounting Standards Board confirmed the convergence of financial reporting standards for Canadian public companies with International Financial Reporting Standards (IFRS). As a result, the Bank will adopt IFRS on November 1, 2011 and will issue its first consolidated financial statements, prepared in accordance with IFRS, for the quarter ending January 31, 2012. Comparative financial information for fiscal 2011 will be provided at that time, prepared in accordance with IFRS, including an opening balance sheet as at November 1, 2010.

2.3 USE OF ESTIMATES AND ASSUMPTIONS

The preparation of consolidated financial statements in accordance with GAAP requires the Bank to make estimates and assumptions that affect the carrying amounts of assets and liabilities on the balance sheet date, income and other related information. The most significant areas for which the Bank has prepared estimates and assumptions are the allowances for credit losses, the fair value of financial instruments, securitization, pension plans and other employee future benefits, and income taxes. Accordingly, actual results could differ from these estimates, in which case the impact would be recognized in the consolidated financial statements in future periods.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 FINANCIAL INSTRUMENTS

Held-for-trading financial instruments

Financial instruments purchased for resale over a short period of time, obligations related to securities sold short, and derivatives not designated in hedge relationships are classified as held-for-trading.

Held-for-trading financial instruments are initially recorded at fair value on the settlement date in the consolidated balance sheet. Subsequently, these financial assets are remeasured at fair value and the realized and unrealized gains and losses are immediately recognized in the consolidated statement of income under income from treasury and financial market operations or income from brokerage operations. Interest income earned, amortization of premiums and discounts as well as dividends received are included in interest income using the accrual basis of accounting. Transaction costs and other fees associated with held-for-trading financial instruments are expensed as incurred.

Financial instruments designated as held-for-trading

Financial instruments, other than those held for trading, may be designated on a voluntary and irrevocable basis as held-for-trading provided that such designation:

- Eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets
 or liabilities or recognizing the related gains and losses on different bases; or
- Pertains to an asset or liability that is managed and whose performance is evaluated on a fair value basis, in accordance with
 a documented risk management or investment strategy, and information about such items is provided internally on that basis to
 the entity's key management personnel; or
- Pertains to a contract containing one or more embedded derivatives that significantly modify the cash flows that otherwise would be required by the contract; and
- Allows for reliable measurement of the fair value of the financial instruments designated as held-for-trading.

Financial instruments designated as held-for-trading are initially recorded at fair value on the settlement date in the consolidated balance sheet. Subsequently, they are remeasured at fair value and the realized and unrealized gains and losses are immediately recognized in the consolidated statement of income under income from treasury and financial market operations, or in securitization income when arising from financial instruments related to securitization transactions. Interest income earned, amortization of premiums and discounts as well as dividends received are included in interest income using the accrual basis of accounting. Transaction costs and other fees associated with financial instruments designated as held-for-trading are expensed as incurred.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

Available-for-sale assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale, or that are not classified as loans and receivables, held-to-maturity investments, held-for-trading or designated as held-for-trading. Available-for-sale financial assets are acquired for an indefinite period and may be sold to meet liquidity requirements or in response to changes in interest rates, exchange rates or equity instrument prices.

These assets are initially recorded at fair value on the settlement date in the consolidated balance sheet. Except for equity instruments that do not have a quoted market price in an active market, available-for-sale financial assets are remeasured at fair value and unrealized gains and losses are recorded in other comprehensive income. When realized, unrealized gains and losses are recognized in the consolidated statement of income under income from treasury and financial market operations. Where there is objective evidence that the asset is impaired and the decline in fair value of the available-for-sale financial asset is other than temporary, the unrealized loss is immediately recognized in the consolidated statement of income. In certain circumstances, particularly where the issuer's financial position subsequently recovers from a particular event, previously recognized impairment losses are reversed. Equity instruments that do not have a quoted market price in an active market are recorded at cost. Interest income earned and amortization of premiums and discounts are included in interest income using the accrual basis of accounting under the effective interest method. Dividends are recognized in interest income on the ex-dividend date. Transaction costs and other fees associated with the acquisition of available-for-sale financial assets are initially deferred and subsequently amortized using the effective interest method according to the instrument to which they relate.

Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity, other than loans and receivables that an entity has the clear intention and ability to hold to maturity. These financial assets are recorded at amortized cost on the settlement date. As at October 31, 2011, and 2010, the Bank had not designated any financial assets as held-to-maturity.

Securities purchased under reverse repurchase agreements and obligations related

to securities sold under repurchase agreements

The Bank enters into short-term purchases of securities under agreements to resell as well as short-term sales of securities under agreements to repurchase at predetermined prices and dates. Given the low risk transfer associated with these purchases and sales, these agreements are treated as collateralized lending and borrowing transactions and are carried in the consolidated balance sheet at the amounts at which the securities were initially acquired or sold, plus accrued interest. Accordingly, securities purchased under reverse repurchase agreements are classified as loans and receivables and obligations related to securities sold under repurchase agreements are classified as other liabilities. Interest earned on reverse repurchase agreements and interest incurred on repurchase agreements are reported as interest income and interest expense, respectively, using the effective interest method.

Loans

Loans are non-derivative financial assets with fixed or determinable payments and are therefore classified as loans and receivables. However, financial assets quoted in an active market do not meet the necessary conditions to be classified as loans and receivables and must be classified as held-for-trading, available-for-sale or held-to-maturity. Moreover, loans that the Bank would intend to sell immediately or in the near term would be classified as held-for-trading.

Loans are initially recorded at fair value on the settlement date in the consolidated balance sheet. They are subsequently recorded at amortized cost using the effective interest method in the balance sheet, net of allowances for loan losses and any unearned interest. Interest income related to loans is accounted for using the accrual basis of accounting under the effective interest method. Commissions and origination fees received in respect of loans, including restructuring and renegotiation charges, are considered to be adjustments to the loan yield and are recorded in interest income over the term of the loans. Loan origination and other fees paid are charged to interest income over the term of the loans. Fees received for loan prepayments are included in interest income upon prepayment.

Impaired loans

Loans, except credit card balances, are classified as impaired when, in management's opinion, there is a reasonable doubt as to the timely recovery of the principal or interest. Loans are classified as impaired when payment of principal or interest is 90 days past due, unless they are well secured or in the process of recovery.

Notwithstanding management's assessment of collectability, all loans which are 180 days past due are classified as impaired except when they are guaranteed or insured by the Canadian government, a provincial government or a Canadian government agency; such loans are classified as impaired loans if they are in arrears for 365 days. Credit card balances are fully written off when payments are 180 days in arrears or when management assesses the likelihood of recovery to be nil.

When loans are classified as impaired, accrual of interest income ceases. The carrying amount of these loans is then adjusted to their estimated realizable value by way of a total or partial write-off and/or an allowance for loan losses.

Subsequent recoveries of interest on impaired loans are recognized in income only if there is no specific allowance and if, in management's opinion, there is no reasonable doubt as to the ultimate recovery of the total principal.

An impaired loan cannot return to a performing status unless all principal and interest payments are current and management has no reasonable doubt as to the recovery of the total principal and interest.

When a portion of the loan is written off and the balance is restructured, the new loan is recorded on the accrual basis of accounting under the effective interest method where there is no longer any reasonable doubt as to the recovery of capital and interest and where payments are not 90 days past due.

Foreclosed assets

Assets acquired by way of settlement of a loan and held for sale are initially measured at fair value less estimated costs to sell, under other assets. The difference between the carrying amount of the loan prior to foreclosure and the amount at which the foreclosed assets are initially measured is recognized in the provision for loan losses.

Any future change in their fair value, but not in excess of the cumulative losses recognized subsequent to the foreclosure date, is recognized as other income in the consolidated statement of income. The revenues generated by foreclosed assets and operating expenses are included in other income and non-interest expenses. If the assets are to be held and used, they are initially measured at fair value and then accounted for in the same manner as similar assets acquired in the normal course of business.

Allowances for losses

The Bank maintains allowances for losses at amounts deemed adequate to absorb all estimated incurred losses in its portfolios. Allowances are mainly related to loans and undrawn amounts under approved credit facilities, but may also apply to other assets.

Allowances for loan losses are increased by the amount charged to the provision for loan losses in the statement of income and reduced by the amount of the write-offs, net of recoveries. Loans are written off when all possible restructuring or recovery activities have been completed and the recovery of other amounts is unlikely.

Specific allowances for loan losses

Specific allowances are maintained to absorb losses on both specifically identified borrowers and other homogeneous loans classified as impaired. Losses relating to loans included in the commercial loan and mortgage loan portfolios and to investment loans included in the personal loan portfolio are determined on a loan-by-loan basis during periodic portfolio reviews. These losses are established by estimating the amounts recoverable in relation to the loan amounts using expected future cash flows discounted at the effective interest rate inherent in the loans.

When these amounts cannot be reasonably estimated, the fair value of the underlying collateral or the observable market price of the loans is used. Losses relating to other personal loans classified as impaired, other than losses arising from credit card balances, are determined based on the write-off experience of the past few years when payments are more than 90 days in arrears. For credit card balances, no specific allowance is maintained; however, outstanding balances are fully written off when payments are 180 days in arrears or when management assesses the likelihood of recovery to be nil.

General allowances for loan losses

General allowances reflect the best estimate of losses incurred in the portfolios in respect of loans that have yet to be identified as impaired.

To establish general allowances, the Bank uses a model based on the internal risk rating of credit facilities and on the related probability of default factors, as well as the loss given default associated with each type of facility. The probability of default and loss given default factors reflect the Bank's historical experience. General allowances are adjusted to reflect changes in the portfolios and credit policies and are maintained for each pool of loans with shared risk characteristics. These estimates include consideration of economic and business conditions, management's judgment and the risks related to the model.

Acceptances and customers' liabilities under acceptances

Acceptances represent an obligation for the Bank with respect to short-term negotiable instruments issued by the Bank's customers to third parties and guaranteed by the Bank. Acceptances are classified as other liabilities. The recourse against the customer in the event that these obligations give rise to a cash outlay is reported as a corresponding asset and classified as loans and receivables. Commissions earned are recorded under other income in the consolidated statement of income.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

Loan securitization

The Bank transfers pools of residential and commercial mortgages to special purpose entities or trusts. These transfers are accounted for as sales when the Bank is deemed to have surrendered control over these assets and has received consideration other than beneficial interests in these assets. At the transfer date, the Bank derecognizes all assets sold, recognizes at fair value the assets received and the liabilities assumed and recognizes the gain or loss on the sale in other income.

In connection with these transactions, the Bank retains, in some instances, interests in securitized receivables such as cash reserve accounts, subordinated securities and excess interest spreads. The gain or loss realized on the sale depends partly on the fair value of the retained interests at the date of sale. Fair value is based on market prices when they are available. However, since prices for retained interests generally do not exist, the Bank normally uses the discounted value of expected future cash flows. These calculations are based on management's best estimates with respect to key assumptions: credit losses, rate of prepayment, interest-rate curve and risk-adjusted discount rates.

Cash reserve accounts and excess interest spreads related to these transactions are initially recorded at fair value under availablefor-sale assets or assets designated as held-for-trading.

In such cases, the retained tranches of subordinated securities are recorded in securities, depending on the Bank's intentions, under available-for-sale assets, held-to-maturity assets or assets designated as held-for-trading.

The Bank generally transfers receivables on a fully serviced basis. On the transfer date, a servicing liability is recognized at fair value and presented in other liabilities. This liability is amortized under securitization income over the term of the transferred loans.

Derivatives and hedges

Derivatives are primarily used to manage the Bank's exposure to interest rate and currency risks and, occasionally, in trading activities or to serve the needs of customers.

All derivatives are recognized at fair value in other assets or liabilities, including derivatives embedded in financial instruments or other contracts that are not closely related to the financial instrument or to the host contract. Changes in fair value of derivatives are immediately recognized in income from treasury and financial market operations or securitization income, except for derivatives designated as cash flow hedges as described below. Interest income and costs related to derivatives are recognized in net interest income in the consolidated statement of income.

When using derivatives to manage its own risks, the Bank determines for each derivative whether hedge accounting is appropriate. If deemed appropriate, the Bank formally documents the hedging relationship, detailing among other things the type of hedge—fair value or cash flow hedge, the item being hedged, the risk management objective, the hedging strategy and the method used to measure its effectiveness. Hedge accounting is deemed appropriate where the derivative is highly effective in offsetting changes in the hedged item's fair value attributed to the hedged risk, both at the hedge's inception and on an ongoing basis. Effectiveness is generally reviewed every month using statistical regression models.

Fair value hedges

Fair value hedge transactions predominantly use interest rate swaps to hedge changes in fair value of assets, liabilities or firm commitments.

For these hedging relationships, the changes in the hedged items' fair value attributable to the hedged risk are recognized in the consolidated statement of income under income from treasury and financial market operations with a corresponding adjustment to the carrying amount of the hedged items in the consolidated balance sheet. Changes in fair value of the hedged items, to the extent that the hedging relationship is effective, are offset by changes in fair value of the hedging derivative. When the hedging relationship ceases to be effective or the hedging instrument is sold or terminated early, hedge accounting is discontinued prospectively. The cumulative adjustment to the carrying amount of the hedged item linked to a hedging relationship that ceases to be effective or for which the hedging derivative is terminated or sold is recognized in net interest income in the periods during which the hedged item affects income. Hedge accounting is also discontinued on the sale or early termination of the hedged item, whereupon the cumulative adjustment to the hedged item's carrying amount is immediately recognized in other income.

Cash flow hedges

Cash flow hedge transactions predominantly use interest rate swaps to hedge the variability in cash flows related to a variable rate asset or liability.

For these hedging relationships, the changes in fair value related to the effective portion of the hedge are recognized in other comprehensive income. Changes in fair value related to the ineffective portion of the hedge are immediately recognized in the consolidated statement of income. Changes in fair value recognized in other comprehensive income are reclassified in the consolidated statement of income under net interest income in the periods during which the cash flows comprising the hedged item affect income.

When the hedging relationship ceases to be effective or the hedging instrument is sold or terminated early, hedge accounting is discontinued prospectively. Changes in fair value recognized in other comprehensive income in respect of a cash flow hedging relationship that ceases to be effective or for which the hedging instrument is sold or terminated early are reclassified in the consolidated statement of income under net interest income in the periods during which the cash flows comprising the hedged item affect income. Hedge accounting is also discontinued on the sale or early termination of the hedged item, whereupon the changes in fair value recognized in accumulated other comprehensive income are then immediately reclassified in the consolidated statement of income.

Deposits

Deposits are generally accounted for at amortized cost using the effective interest method and are classified as other liabilities. Interest expense on deposits is recorded on the accrual basis of accounting under the effective interest method. The commissions paid and other fees are added to interest expense over the term of the deposits. Deposits are presented net of unamortized commissions and other fees on the consolidated balance sheet.

Indexed deposit contracts

Certain deposit obligations, such as equity-linked guaranteed investment certificates where the deposit obligation varies according to the performance of certain stock market indexes, may be subject to a guaranteed minimum redemption amount, such as the obligation to return the investor's initial investment at maturity. These obligations include an embedded derivative instrument that has to be accounted for separately. Accordingly, like all derivatives, it is recorded at fair value and changes in fair value are recognized in the consolidated statement of income under income from treasury and financial market operations. The deposit obligation, excluding the embedded derivative, is recorded at amortized cost using the effective interest method. The deposit obligation, including the embedded derivative, is reported in the consolidated balance sheet under personal deposits.

Subordinated debt

Subordinated debt is accounted for at amortized cost using the effective interest method and is classified as other liabilities. Interest expense on subordinated debt is recorded on the accrual basis of accounting under the effective interest method. The commissions paid and other fees are added to interest expense over the term of the subordinated debt.

Measuring the fair value of financial instruments

Fair value is defined as the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act.

The fair value of a financial instrument on initial recognition is normally the transaction price, that is, the fair value of the consideration given or received. In certain circumstances, the initial fair value may be based on other observable market transactions for the same instrument or on a valuation technique whose variables include only data from observable markets. With regard to financial instruments related to securitization transactions, valuation techniques include unobservable data related to rate of prepayment and rate of credit losses.

Subsequent to initial recognition, the fair values of financial instruments that have a quoted market price in an active market are generally based on bid prices for financial assets held and offer prices for financial liabilities. Where financial instruments have no quoted prices in active markets, fair values are determined using valuation techniques incorporating, among other things, current market prices for financial instruments with similar characteristics and risk profiles, contractual prices of the underlying instruments, yield curves and volatility factors. In certain cases, parameters not based on observable market data must also be used. The valuations may also be adjusted to reflect the uncertainty in these parameters. In particular, valuation adjustments may be made with respect to the liquidity or counterparty credit risk of financial instruments that have no available quoted market prices in an active market.

Fair values of derivatives are generally determined using valuation techniques incorporating certain observable data, such as current market prices and the contractual prices of the underlying instruments, yield curves and volatility factors. The determination of the fair value of derivatives related to securitization transactions also involves unobservable data.

Measurement of the fair value of financial instruments is described in greater detail in note 20.

Offsetting of financial assets and liabilities

Financial assets and liabilities are offset and the net amount is presented in the consolidated balance sheet when the Bank has a legally enforceable right to set off the recognized amounts and intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

3.2 PREMISES AND EQUIPMENT

Land is carried at cost. Other premises and equipment are recorded at cost less accumulated depreciation and are depreciated over their estimated useful lives using the following methods and rates.

| | METHODS | RATE/PERIOD |
|-------------------------|-------------------|---|
| Premises | Declining balance | 5% |
| Leasehold improvements | Straight-line | Term of the lease, plus initial renewal option |
| Equipment and furniture | Declining balance | 20% |
| Computer hardware | Straight-line | 5–10 years |

Gains and losses on the disposal of premises and equipment are recognized in other income.

3.3 GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill from business combinations is tested for impairment annually, unless there is clear evidence that, based on the most recent valuation and the current circumstances, the fair value of the reporting unit to be tested significantly exceeds its carrying amount.

The impairment test initially compares the fair value of the reporting unit to which the goodwill relates to its carrying amount. When potential impairment is identified, the fair value of goodwill is compared to its carrying amount. The Bank mainly uses the discounted cash flow method to determine the fair value of its reporting units.

Intangible assets with a finite life are amortized on a straight-line basis over their estimated useful life, which is fifteen years for contractual relationships with financial intermediaries and customer relationships and ranges from five to ten years for software, and are also tested for impairment whenever circumstances indicate that the carrying value may not be fully recoverable. When the net carrying amount exceeds the estimated future net cash flows, intangible assets with finite lives are considered impaired and are written down to their fair value.

Any impairment arising from a decline in value of goodwill or intangible assets is charged to income in the period in which the losses are incurred.

3.4 EMPLOYEE FUTURE BENEFITS

Pension plans

The Bank maintains a number of defined benefit pension plans for its employees, including certain defined contribution portions. Funding is generally provided by both the Bank and the members of the plans.

Under the defined benefit plans, the Bank records its benefit obligation under employee pension plans and the related costs net of plan assets. An actuarial valuation is performed periodically to determine the present value of accrued pension obligations. The pension obligations of the defined benefit pension plans are actuarially determined using the projected benefit method prorated on services, which incorporates management's best estimate of future salary levels, other cost escalation, retirement ages of employees and other actuarial factors. The obligation for accrued benefits is measured using market interest rates at the valuation date. Pension plan assets are measured at fair value. The expected return on plan assets is calculated using a market-related value approach under which changes in the fair value of plan assets are taken into account over a three-year period. Defined benefit costs recognized consist of: [a] the cost for the current year's service, [b] interest expense on the accrued benefit obligation, [c] expected long-term return on plan assets, [d] amortization of the transitional obligation, past service costs and actuarial gains or losses, [e] gains or losses arising from special events, and [f] the change in the valuation allowance.

Actuarial gains or losses arise, in particular, from the difference between the actual long-term rate of return on plan assets and the expected rate of return on such assets, based on management's best-estimate assumptions, as well as from changes in actuarial assumptions used to determine the accrued benefit obligation. Net actuarial gains or losses are amortized when, at the beginning of the year, the unamortized balance of the gain or loss exceeds 10% of the greater of the accrued benefit obligation or the market value of plan assets. This excess is amortized on a straight-line basis over the expected average remaining service life of the employee groups covered by the plans which varied from 4 to 11 years in 2011 under the plans (from 8 to 11 years in 2010).

The past service cost resulting from changes to the defined benefit plans is amortized on a straight-line basis over the expected average remaining service life of the employee groups covered by the defined benefit plans. The transitional obligation resulting from the initial application of the accounting standard with respect to employee future benefits, on November 1, 2000, is amortized on a straight-line basis over the expected average remaining service life of the employee groups on that date, ranging from 10 to 16 years.

Accrued benefit assets or liabilities represent the cumulative variance between pension expense and contributions paid and are included in other assets or other liabilities.

For the defined contribution portion, the expense corresponds to the contributions the Bank is required to make during the year.

Other plans

The Bank offers its employees certain post-employment benefits. In addition, under former agreements, the Bank provides certain health care and life insurance benefits to retired employees. The costs related to these benefits are recognized during the employees' service life according to accounting policies similar to those applied to defined benefit pension plans. The transitional obligation resulting from the initial application of the accounting standard with respect to employee future benefits, on November 1, 2000, is amortized on a straight-line basis over the remaining life expectancy of retirees for post-retirement benefits, which equals 20 years, and over the expected average remaining service life of the employee groups covered for the post-employment benefits, which was 13 years.

3.5 INCOME TAXES

The Bank uses the liability method of tax allocation and accounts for the future income tax assets and liabilities related to loss carryforwards and other temporary differences between the carrying amounts and the tax bases of assets and liabilities, in accordance with tax laws and rates enacted or substantively enacted on the date the differences are expected to reverse. A valuation allowance is established, as needed, to reduce the future income tax asset to the amount that is more likely than not to be realized.

3.6 EARNINGS PER SHARE

The Bank calculates its basic earnings per share by dividing net income for the year, after deduction of preferred share dividends, including applicable income taxes, as well as premiums on redemption of preferred shares, by the weighted average number of common shares outstanding for the year.

Diluted earnings per share is calculated assuming that the proceeds received from the exercise of share purchase options, whose exercise price is lower than the average price of the common shares for the year, are used to repurchase common shares at that average market price.

3.7 INSURANCE

Through an agreement with an unrelated insurance company, the Bank is engaged mainly in credit life and disability insurance activities. Insurance premiums are recognized as revenue, net of reinsurance, on a pro rata basis over the terms of the underlying policies. Insurance claims and changes in policy holder benefits estimates are recorded as incurred. These activities are presented in other income under credit insurance income.

3.8 STOCK-BASED COMPENSATION

Since November 1, 2002, the Bank has used the fair-value method of accounting for share purchase options granted to senior management. For these awards, the Bank recognizes the fair value of the options granted as an increase in the related compensation expense and contributed surplus during the option vesting period. When the options are exercised, the proceeds received and the amount of the contributed surplus are credited to common shares. The value of the options granted is determined using the Black and Scholes option-pricing model using management's best estimates.

With respect to awards granted prior to November 1, 2002, the Bank continues to apply the previous standards under which no compensation cost is recognized when share purchase options are awarded to employees and the consideration paid by the employees who exercise their options is credited to common shares.

For the stock appreciation rights settled in cash, the excess of the share price over the exercise price, reviewed on an ongoing basis, is recognized in income during the rights' vesting period.

Compensation expense in respect of the restricted share unit plan and in respect of the performance-based share plan is recognized during the rights' vesting period, based on the Bank's market share price and on defined performance criteria.

The Bank's contributions related to the employee share purchase program are recognized as compensation expense.

3.9 ASSETS UNDER ADMINISTRATION AND ASSETS UNDER MANAGEMENT

The Bank administers and manages assets held by customers that are not recognized in the consolidated balance sheet. Revenues derived from the administration and management of these assets are recorded in other income, as the service is provided.

3.10 TRANSLATION OF FOREIGN CURRENCIES

Financial assets and financial liabilities denominated in foreign currencies are translated into Canadian dollars at the prevailing year-end exchange rates. Income and expenses are translated at the average monthly exchange rates. Realized or unrealized gains and losses resulting from the translation of foreign currencies are included in other income, with the exception of unrealized gains and losses arising from the translation of available-for-sale financial instruments, which are included in other comprehensive income.

3.11 CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash and non-interest-bearing deposits with other banks, and are classified in the loans and receivables category. Cash comprises bank notes and coins.

| | | \$299,788 | \$711,954 | \$ - | \$1,011,742 | \$1,658,478 |

[1] Yield based on the amortized cost of available-for-sale securities.
 [2] Including mortgage-backed securities that are fully guaranteed by the Canada Mortgage and Housing Corporation pursuant to the National Housing Act.

GAINS AND LOSSES RECOGNIZED IN INCOME

Gains and losses on the portfolio of available-for-sale securities

The following items were recognized in income with regard to the portfolio of available-for-sale securities:

| | 2011 | 2010 |
|---|------------------|------------------|
| Realized net gains Write-downs for impairment recognized in income | \$4,503 (369) | \$3,165 (198) |
| | \$4,134 | \$2,967 |

Write-downs for impairment recognized in 2011, as in 2010, stemmed from available-for-sale securities for which the unrealized losses were deemed other than temporary. Assessing whether impairment is other than temporary requires judgment. The Bank considered many factors in making the other-than-temporary impairment assessment. These factors include the duration of the impairment and its significance compared to amortized cost, bankruptcy, capital restructuring or dilution, and significant modifications in the issuer's operations, as well as other uncertainties that could impact future cash flows.

GAINS AND LOSSES RECOGNIZED IN COMPREHENSIVE INCOME

Unrealized gains and losses on the portfolio of available-for-sale securities

| | | | | 2011 |
|------------------------------------|-------------------|---------------------|----------------------|---------------|
| | AMORTIZED COST | UNREALIZED GAINS | UNREALIZED LOSSES | FAIR VALUE |
| Securities issued or guaranteed | | | | |
| by Canada ⁽¹⁾ | \$ 237,509 | \$ 149 | \$ - | \$ 237,658 |
| by provinces | 410,861 | 4,286 | 29 | 415,118 |
| Other debt securities | 303,797 | 7,396 | 560 | 310,633 |
| Asset-backed securities | 23,292 | 1,765 | 3 | 25,054 |

| | \$1,082,612 | \$18,346 | \$4,625 | \$ 1,096,333 |
| | | | | 2010 |
| | AMORTIZED COST | UNREALIZED GAINS | UNREALIZED LOSSES | FAIR VALUE |
| Securities issued or guaranteed | | | | |
| by Canada ^[1] | \$ 432,649 | \$ 45 | \$ 24 | \$ 432,670 |
| by provinces | 407,449 | 4,498 | - | 411,947 |
| Other debt securities | 132,595 | 6,996 | 163 | 139,428 |
| Asset-backed securities | 24,694 | 1,278 | 53 | 25,919 |
| Preferred shares | 56,776 | 1,524 | 52 | 58,248 |
| Common shares and other securities | 32,796 | 3,392 | 656 | 35,532 |
| | \$1,086,959 | \$17,733 | \$948 | \$1,103,744 |

[1] Including mortgage-backed securities that are fully guaranteed by the CMHC pursuant to the National Housing Act.

As at October 31, 2011, unrealized losses related mainly to listed securities of Canadian financial institutions and energy companies. Decreases in value are fairly recent, and, in addition, these companies have maintained a strong financial position and their business plans remain sound. As a result, management has determined these declines in fair value to be temporary and included them in accumulated other comprehensive income.

OTHER CONSIDERATIONS

Additional information regarding securities

Note 20 contains additional information on the determination of fair value of securities.

5 LOANS

LOANS AND IMPAIRED LOANS

| | GROSS AMOUNT OF LOANS | GROSS AMOUNT OF IMPAIRED LOANS | SPECIFIC ALLOWANCES | GENERAL ALLOWANCES | TOTAL ALLOWANCES |
|--|---|---|---------------------------------------|--|---|

| Residential mortgages ^[1] | 8,582,548 | 39,304 | 4,256 | 2,861 | 7,117 |
| Commercial mortgages | 1,638,861 | 34,316 | 10,934 | 6,212 | 17,146 |
| Commercial and other | 1,691,190 | 98,106 | 44,391 | 34,883 | 79,274 |
| | \$17,543 387 | \$188,123 | \$64,893 | \$73,250 | \$138,143 |

2011

(1) Include mortgage loans on residential real estate development properties and projects.

Foreclosed assets

Held-for-sale assets acquired in 2011 with respect to impaired loans which are managed for sale in an orderly manner amounted to \$5.5 million (\$3.7 million in 2010). There were no specific allowances with regards to these loans prior to foreclosure (nil in 2010).

SPECIFIC ALLOWANCES FOR LOAN LOSSES

| | | | | | 2011 | 2010 |
|---------------------------------------|-------------------|--------------------------|-------------------------|----------------------------------|---------------------------------|---------------------------------|
| | PERSONAL LOANS | RESIDENTIAL MORTGAGES | COMMERCIAL MORTGAGES | COMMERCIAL AND OTHER LOANS | TOTAL SPECIFIC ALLOWANCES | TOTAL SPECIFIC ALLOWANCES |

| the consolidated statement of income | (714) | 8,964 | 5,346 | (13,244) | 352 | - |
| Balance at end of year | \$28,580 | \$11,825 | \$11,558 | \$21,639 | \$73,602 | \$73,250 |

LOANS PAST DUE BUT NOT IMPAIRED

Personal and residential mortgage loans past due shown in the table below are not classified as impaired because they are less than 90 days past due or they are secured such as to reasonably expect full recovery. Commercial loans past due but not impaired are not significant.

| | | | As at Octob | er 31, 2011 |
|--|-----------------------|---------------------|--------------------|----------------------|
| | 1 DAY– 31 DAYS | 32 DAYS- 90 DAYS | OVER 90 DAYS | TOTAL |
| Personal loans Residential mortgages ⁽¹⁾ | \$ 98,641 176,959 | \$37,630 23,710 | \$ 5,188 22,406 | \$141,459 223,075 |
| | \$275,600 | \$61,340 | \$27,594 | \$364,534 |
| | | | As at Octob | oer 31, 2010 |
| | 1 DAY– 31 DAYS | 32 DAYS- 90 DAYS | OVER 90 DAYS | TOTAL |
| Personal loans Residential mortgages ⁽¹⁾ | \$ 103,203 251,282 | \$26,478 26,850 | \$ 7,160 21,085 | \$136,841 299,217 |
| | \$354,485 | \$53,328 | \$28,245 | \$436,058 |

(1) Include mortgage loans on residential real estate development properties and projects.

6. LOAN SECURITIZATION

RESIDENTIAL MORTGAGE LOANS

Under the securitization program governed by the *National Housing Act*, the Bank securitizes residential mortgage loans secured by the Canadian Mortgage and Housing Corporation (CMHC) through the creation of mortgage-backed securities. The Bank also securitized conventional residential mortgages prior to 2008. Gains before income taxes, net of transaction costs, are recognized in other income under securitization income.

The following table summarizes the residential mortgage securitization transactions carried out by the Bank.

| | 2011 | 2010 |
|---|-------------|-----------|
| Cash proceeds, net of transaction costs | \$1,547,904 | \$821,364 |
| Rights to future excess spreads | 80,105 | 36,923 |
| Servicing liability | (12,878) | (6,168) |
| Other | (3,260) | (5,461) |
| | 1,611,871 | 846,658 |
| Residential mortgages securitized and sold ^[1] | (1,552,059) | (824,107) |
| Write-off of loan origination costs | (17,337) | (9,080) |
| Gains before income taxes, net of transaction costs | \$ 42,475 | \$ 13,471 |

(1) Fully insured by the CMHC.

Key assumptions used to determine the initial fair value of retained interests regarding the transfer of residential mortgages are summarized as follows.

KEY ASSUMPTIONS

| | 2011 | 2010 |
|--------------------------------|------|------|
| Weighted average term (months) | 32 | 30 |
| Rate of prepayment | 18% | 19% |
| Discount rate | 1.7% | 1.9% |

No loss is expected on insured residential mortgages.

Securitization income, as reported in the consolidated statement of income, is detailed in the following table.

| | 2011 | 2010 |
|---|----------|----------|
| Gains on securitization operations | \$42,475 | \$13,471 |
| Changes in fair value of retained interests related | | |
| to excess spreads, securitization swaps and financial | | |
| instruments held for economic hedging purposes | (11,028) | (8,611) |
| Management income | 8,058 | 6,958 |
| Other | (4,019) | (5,822) |
| | \$35,486 | \$ 5,996 |

During the year, the Bank collected cash flows from retained interests totalling \$65.3 million (\$54.2 million in 2010).

Sensitivity analysis

The following table shows the value of retained interests, as well as the sensitivity of the fair value of these interests to immediate unfavourable changes of 10% and 20% in the key assumptions used to value retained interests as at October 31, 2011 and 2010.

SENSITIVITY OF KEY ASSUMPTIONS TO UNFAVOURABLE CHANGES

| | 2011 | 2010 |
|--|-----------|----------|
| Fair value of retained interests | \$122,760 | \$97,085 |
| Weighted average life (in months) | 23 | 22 |
| Rate of prepayment | 20% | 20% |
| Impact on fair value of unfavourable change of 10% | \$ 3,223 | \$ 2,484 |
| Impact on fair value of unfavourable change of 20% | \$ 6,301 | \$ 4,857 |
| Discount rate | 1.22% | 1.50% |
| Impact on fair value of unfavourable change of 10% | \$ 195 | \$ 166 |
| Impact on fair value of unfavourable change of 20% | \$ 389 | \$ 331 |

These sensitivities are hypothetical and should be used with caution. Changes in the fair value attributed to changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in the fair value may not be linear. Changes in one factor may result in changes in another factor, which might magnify or counteract the fluctuations attributed to changes in key assumptions.

LOANS UNDER MANAGEMENT

The total principal amount of outstanding securitized residential mortgage loans under management amounted to \$3.4 billion at the end of fiscal 2011 (\$2.7 billion in 2010). Of that amount, loans that are more than 31 days past due totalled \$20.5 million (\$18.9 million in 2010). There were no credit losses in respect of these loans in 2011 and in 2010.

COMMERCIAL MORTGAGE LOANS

Apart from the above-mentioned securitization transactions, the Bank sold \$29.3 million in commercial mortgages, generating a \$296,000 gain in 2011 (\$1.5 million in 2010, generating a \$18,000 gain). In addition, the Bank manages commercial loans for third parties amounting to \$300 million (\$207 million in 2010).

7 PREMISES AND EQUIPMENT

| | | | 2011 | 2010 |
|-------------------------|-----------|-----------------------------|----------------------|----------------------|
| | COST | ACCUMULATED DEPRECIATION | NET BOOK VALUE | NET BOOK VALUE |
| Land | \$ 416 | \$ - | \$ 416 | \$ 416 |
| Premises | 3,445 | 1,446 | 1,999 | 2,010 |
| Leasehold improvements | 79,636 | 46,354 | 33,282 | 29,130 |
| Equipment and furniture | 85,587 | 72,502 | 13,085 | 11,283 |
| Computer hardware | 134,463 | 118,493 | 15,970 | 15,697 |
| | \$303,547 | \$238,795 | \$64,752 | \$58,536 |

Depreciation expense for the year in the consolidated statement of income amounted to \$11.1 million (\$10.9 million in 2010).

8 GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill totalling \$53.8 million was recognized in the Retail & SME-Québec segment.

Other intangible assets consist of the following.

| | | | 2011 | 2010 |
|--|---------------------|-----------------------------|----------------------|----------------------|
| | COST | ACCUMULATED AMORTIZATION | NET BOOK VALUE | NET BOOK VALUE |
| Software Contractual and customer relationships | \$371,321 18,278 | \$257,205 9,037 | \$114,116 9,241 | \$101,910 10,459 |
| | \$389,599 | \$266,242 | \$123,357 | \$112,369 |

Software includes \$29.9 million (\$11.9 million in 2010) pertaining to projects under development yet to be amortized.

Amortization expense of other intangible assets recorded in the consolidated statement of income during the year was \$29.9 million (\$26.3 million in 2010).

The Bank tests goodwill for impairment on an annual basis. No impairment was recognized in 2011 and 2010.

9 OTHER ASSETS

| | 2011 | 2010 |
|---|-----------|-----------|
| Assets related to securitized mortgage loans | \$136,048 | \$107,460 |
| Cheques and other items in transit | 128,904 | 115,710 |
| Accrued benefit assets (note 16) | 122,203 | 127,349 |
| Accrued interest receivable | 80,344 | 82,480 |
| Deferred charges related to loan origination | 72,826 | 71,557 |
| Future income tax assets (note 17) | 4,160 | 29,579 |
| Accounts receivable, prepaid expenses and other items | 67,539 | 51,227 |
| | \$612,024 | \$585,362 |

10 DEPOSITS

| | | | | 2011 |
|---------------------------------------|-------------------------|--------------------------|---------------------------|---------------------------|
| | DEMAND | NOTICE | TERM | TOTAL |
| Personal Business, banks and other | \$ 119,022 1,469,372 | \$4,801,007 1,025,594 | \$10,689,983 1,962,440 | \$15,610,012 4,457,406 |
| | \$1,588,394 | \$5,826,601 | \$12,652,423 | \$20,067,418 |
| | | | | 2010 |
| | DEMAND | NOTICE | TERM | TOTAL |
| Personal Business, banks and other | \$ 122,717 1,481,642 | \$4,557,386 850,899 | \$10,716,808 1,918,278 | \$15,396,911 4,250,819 |
| | \$1,604,359 | \$5,408,285 | \$12,635,086 | \$19,647,730 |

Demand deposits consist of deposits in respect of which the Bank is not authorized to require notice prior to withdrawal by customers. These deposits primarily consist of chequing accounts.

Notice deposits consist of deposits in respect of which the Bank may legally require a withdrawal notice. These deposits generally consist of savings accounts.

Term deposits include deposits maturing at a specific date, particularly term deposits and guaranteed investment certificates.

11 OTHER LIABILITIES

| | 2011 | 2010 |
|--|-----------|-----------|
| Accrued interest payable | \$452,308 | \$465,637 |
| Cheques and other items in transit | 179,222 | 244,342 |
| Liabilities related to securitized mortgage loans | 51,636 | 33,190 |
| Future income tax liabilities (note 17) | 43,482 | 41,520 |
| Accrued benefit liabilities (note 16) | 19,498 | 17,874 |
| Accounts payable, accrued expenses and other items | 166,044 | 145,316 |
| | \$912,190 | \$947,879 |

12 SUBORDINATED DEBT

The subordinated debt is a direct unsecured obligation of the Bank and is subordinated in right of payment to the claims of depositors and certain other creditors of the Bank. Any repurchase or cancellation of subordinated debt must be approved by OSFI.

ISSUANCE

On November 2, 2010, the Bank issued \$250.0 million Series 2010-1 Medium Term Notes (Subordinated Indebtedness), for net proceeds of \$248.4 million. The contractual maturity of the Series 2010-1 Medium Term Notes is November 2, 2020. Holders of the Series 2010-1 Medium Term Notes are entitled to receive semi-annually fixed interest payments for the initial five-year period ending November 2, 2015 at a rate of 3.70% per annum. The interest rate on the Series 2010-1 Medium Term Notes will reset on November 2, 2015 at the three-month bankers' acceptance rate plus 1.76% per annum.

The Series 2010-1 Medium Term Notes will not be redeemable prior to November 2, 2015. Subject to the provisions of the *Bank Act*, to the prior consent of OSFI and to the provisions described in the pricing supplement dated October 25, 2010, at any time on or after November 2, 2015, the Bank may redeem all or any part of the then outstanding Series 2010-1 Medium Term Notes, at the Bank's option, by the payment of an amount in cash equal to the par value together with unpaid accrued interest.

The \$250.0 million Series 2010-1 Medium Term Notes are presented net of unamortized issue costs of \$1.6 million on the consolidated balance sheet and include a net fair value adjustment of \$5.9 million to reflect the change in the carrying value previously covered by a fair value hedge.

REDEMPTION

On January 25, 2011, the Bank redeemed all of its 4.90% Subordinated Debentures, Series 10, maturing in 2016, with an aggregate notional amount of \$150.0 million. The Debentures were redeemed at par plus accrued and unpaid interest to the date of redemption.

| ISSUED AND OUTSTANDING | | | | | |

13 CAPITAL STOCK [CONT'D]

Terms of shares

lerms of shares

The Class A Preferred Shares, Series 9, are redeemable at the Bank's option since December 15, 2006 at a price of \$25 each.

The Class A Preferred Shares, Series 10, are redeemable at the Bank's option since June 15, 2009 at a price of \$25 each plus, if the redemption takes place before June 15, 2013, a premium of \$1 which will decrease to zero depending on the redemption date.

The Bank could also convert all or a portion of these preferred shares into common shares under certain circumstances; however, on November 17, 2010, the Bank irrevocably renounced its right of conversion into common shares.

COMMON SHARES

Issuance of common shares

During the year, 4,075 common shares (6,999 common shares in 2010) were issued under the employee share purchase option plan for the management of the Bank for a cash consideration of \$0.1 million (\$0.2 million in 2010).

RESTRICTIONS ON THE PAYMENT OF DIVIDENDS

The Bank is prohibited by the *Bank Act* (Canada) from declaring or paying any dividends on its preferred shares or common shares if there are reasonable grounds for believing that, in so doing, the Bank would not comply with capital adequacy and liquidity regulations or guidance given by OSFI regarding the Bank's capital or liquidity.

The Bank's ability to pay common share dividends is also restricted by the terms of the outstanding preferred shares. These terms provide that the Bank may not pay dividends on its common shares at any time without the approval of holders of the outstanding preferred shares, unless all dividends that are then payable have been declared and paid or set apart for payment.

CAPITAL MANAGEMENT

Management's objective is to maintain an adequate level of capital, in line with its risk profile, to support the Bank's activities, while enhancing shareholder value. In order to achieve this objective, the Bank has a capital management framework that includes a Capital Management and Adequacy Policy, a Capital Plan and an Internal Capital Adequacy Assessment Process (ICAAP).

The ICAAP is an integrated process that evaluates capital adequacy relative to the Bank's risks and helps set the minimum capital levels acceptable for the Bank. Capital adequacy depends on various internal and external factors. The Bank's capital level underscores its solvency and capacity to fully cover operating risks related to its operations while providing depositors and creditors with the safeguards they seek. Moreover, capital requirements are aligned with its Strategic Plan, industry capitalization levels and investors' and shareholders' expectations. While rating agencies do not assign credit ratings to the Bank based solely on capital levels, the Bank's capital must be consistent with the credit rating sought. As a result, the Bank's capital adequacy targets vary over time in line with these factors.

Each year, the Board of Directors reviews and approves several capital-related documents, including the Capital Management and Adequacy Policy, the ICAAP, the Business and Financial Three-Year Plan, as well as the Capital Plan. The Board's Risk Management Committee reviews capital adequacy on a quarterly basis. Management monitors capital ratios on a monthly basis. The Integrated Risk Management Department oversees the Bank's capital management framework. Some of these responsibilities include monitoring capital limits and adequacy as well as developing and implementing the Capital Management and Adequacy Policy. The Bank's Treasury Department develops the Capital Plan and manages capital on an ongoing basis.

The regulatory capital calculation is determined based on the guidelines issued by OSFI originating from the Basel Committee on Banking Supervision (BCBS) regulatory risk-based capital framework. Tier 1 capital represents more permanent forms of capital, is free of mandatory fixed charges against earnings and has a subordinate legal position to the rights of depositors and other creditors of the financial institution. Tier 2 capital consists of supplementary capital instruments that contribute to the overall strength of a financial institution as a going concern. Total capital is defined as the sum of Tier 1 and Tier 2 capital.

Regulatory capital requirements impose minimum levels of capital that have to be taken into consideration with the other factors mentioned above when assessing the Bank's capital adequacy. Under BCBS standards, banks must maintain a minimum Tier 1 capital ratio of 4% and a total capital ratio of at least 8%. OSFI requires that Canadian deposit-taking financial institutions maintain a minimum Tier 1 capital ratio of 7% and a total capital ratio of at least 10%. The Bank opted for the Standardized Approach in determining credit risk capital and, as at January 31, 2011, the Bank has chosen to use the Standardized Approach to account for operational risk instead of the Basic Indicator Approach. The Bank and its subsidiaries were in compliance with OSFI's capital requirements throughout the year.

Regulatory capital is detailed below.

REGULATORY CAPITAL

| | 2011 | 2010 |
|---|-------------|-------------|
| Tier I capital | | |
| Common shares | \$ 259,492 | \$ 259,363 |

15 STOCK-BASED COMPENSATION

SHARE PURCHASE OPTION PLAN

The Bank offers a share purchase option plan to senior managers of the Bank and its subsidiaries. Under this plan, the exercise price of options for the purchase of common shares must not be less than the market prices of such shares immediately prior to the grant date.

The right to exercise the options vests gradually over a maximum five-year period and the options may be exercised at any time up to ten years after they have been granted.

The Bank had reserved 1,600,000 common shares (1,600,000 shares in 2010) for the potential exercise of share purchase options, of which 124,962 were still available as at October 31, 2011 (124,962 in 2010).

No new share options were granted in 2011 and 2010.

The following table summarizes the Bank's share purchase option activities for the years ended October 31.

| | | 2011 | | 2010 |
|---|----------------------|---|----------------------|---|
| | NUMBER OF OPTIONS | WEIGHTED AVERAGE EXERCISE PRICE PER OPTION | NUMBER OF OPTIONS | WEIGHTED AVERAGE EXERCISE PRICE PER OPTION |
| Outstanding at beginning of year Exercised | 54,075 (4,075) | \$29.65 \$31.80 | 61,074 (6,999) | \$28.79 \$22.13 |
| Outstanding at end of year | 50,000 | \$29.47 | 54,075 | \$29.65 |
| Exercisable at end of year | 50,000 | \$29.47 | 41,575 | \$29.70 |

All outstanding options as at October 31, 2011 are expiring in December 2016.

STOCK APPRECIATION RIGHTS PLAN

The Bank offers a stock appreciation rights (SARs) plan to members of senior management of the Bank and its subsidiaries. These SARs may be cash settled for an amount equal to the difference between the SAR exercise price and the closing price of the common shares at the measurement date. SARs vest over a maximum period of five years and can be exercised over a maximum period of ten years. The expense related to these units is recognized in income over their vesting period. No SARs were granted during 2011 and 2010.

The following table summarizes the Bank's SARs outstanding balances as at October 31.

STOCK APPRECIATION RIGHTS

| | AVERAGE EXERCISE PRICE | NUMBER OF SARs OUTSTANDING | WEIGHTED AVERAGE REMAINING CONTRACTUAL LIFE (YEARS) | NUMBER OF SARs EXERCISABLE |
|------|------------------------------|----------------------------------|---|----------------------------------|
| 2011 | \$34.44 | 427,540 | 5.27 | 283,923 |
| 2010 | \$34.01 | 517,510 | 6.06 | 258,235 |

PERFORMANCE-BASED SHARE UNIT PLAN

The Bank offers a performance-based share unit (PSU) plan to certain members of senior management. The plan provides for the grant of performance-based share units calculated using a certain percentage of the plan member's salary. Under the plan, rights to 37.5% of these units vest over three years. The rights to the remaining 62.5% units vest after three years and upon meeting certain financial objectives. The holders of such share units are entitled to an amount equivalent to the dividends paid on the Bank's common shares, which is also converted into additional share units. The expense related to these units is recognized in income over their vesting period.

The following table summarizes the Bank's PSU plan activities for the years ended October 31 and the related outstanding balances as at October 31.

PERFORMANCE SHARE UNITS

| | | FOR THE YEA | RS ENDED OCTOBER 31 | AS AT OCTOBER 31 |
|------|----------------------------|---------------------------|---------------------|--------------------------------|
| | NUMBER OF UNITS GRANTED | VALUE OF UNITS GRANTED | VESTING DATE | NUMBER OF UNITS OUTSTANDING |
| 2011 | 50,700 | \$45.77 | December 2013 | 164,782 |
| 2010 | 50,926 | \$43.15 | December 2012 | 136,851 |

RESTRICTED SHARE UNIT PLANS

The Bank offers a restricted share unit (RSU) plan to certain members of senior management. Under the plan, 50% of the annual bonus otherwise payable to an eligible employee, under the Bank's short-term incentive compensation program, can be withheld and converted into fully vested restricted share units at the employees' option. The Bank undertakes to grant additional RSUs equal to 60% of the withheld bonus. These additional units will vest at the end of the three-year period following their award. A deferred version of the plan exists under which the participant is paid on termination of employment rather than at the end of the three-year period.

The Bank also offers a RSU plan to certain employees of the capital markets sector. Under that plan, 30% of the annual bonus over a certain amount that would otherwise be payable to an eligible employee has to be withheld and converted into fully vested restricted share units. This plan does not provide for any employer contribution and a third of the restricted share units are redeemed at each of the first three anniversary dates of the grant.

The holders of share units of both plans are entitled to an amount equivalent to the dividends paid on the Bank's common shares, which is also converted into additional share units. The expense related to these units is recognized in income over their vesting period.

The following table summarizes the Bank's RSU plans activities for the years ended October 31 and related outstanding balances as at October 31.

RESTRICTED SHARE UNITS

| | | | | FOR THE YEA | RS ENDED OCTOBER 31 | | AS AT OCTOBER 31 |
|------|--------------------------------------|--|-------------------------------|------------------------------|-----------------------|--------------------------------|---------------------------|
| | PLANS | NUMBER OF UNITS CONVERTED ⁽¹⁾ | NUMBER OF UNITS GRANTED | VALUE OF UNITS GRANTED | VESTING DATE | NUMBER OF UNITS OUTSTANDING | NUMBER OF UNITS VESTED |
| 2011 | Senior management Capital markets | 39,559 25,029 | 23,736 | \$45.77 \$45.77 | December 2013 n.a. | 225,936 25,892 | 197,666 25,892 |
| 2010 | Senior management | 38,268 | 22,961 | \$43.15 | December 2012 | 217,002 | 102,780 |

(1) Corresponds to the portion of annual bonuses converted in RSU. These units are fully vested at grant date.

DEFERRED SHARE UNIT PLAN

The Bank offers a deferred share unit plan to non-employee directors of the Bank. Under this plan, each director may choose to receive all or a percentage of his or her remuneration in the form of deferred share units which can be settled in cash. The deferred share units are converted when the holder steps down from the Board of Directors. In 2011, the Bank paid out 2,843 deferred share units as compensation (2,944 in 2010). As at October 31, 2011, there were 7,176 units (4,333 in 2010) outstanding with a total value of \$0.3 million (\$0.2 million in 2010).

15 STOCK-BASED COMPENSATION (CONT'D)

EMPLOYEE SHARE PURCHASE PLAN

The Bank offers an employee share purchase plan. Under this plan, employees who meet the eligibility criteria can contribute up to 5% of their annual gross salary by way of payroll deductions. The Bank matches 30% of the employee contribution amount, up to a maximum of \$1,500 per year. The Bank's contributions vest to the employee two years after each employee contribution. The Bank's contributions, totalling \$0.4 million during fiscal 2011 (\$0.4 million in 2010), are recognized in salaries and employee benefits. The average value of the granted shares under this plan was \$47.17 in fiscal 2011 (\$43.02 in 2010).

STOCK-BASED COMPENSATION PLAN EXPENSE

The following table presents the expense related to all stock-based compensation plans, net of the effect of related hedging transactions.

| | 2011 | 2010 |
|---|---------------------|---------------------|
| Stock-based compensation plan expense Effect of hedges | \$ 5,211 (1,975) | \$ 6,831 (4,013) |
| Total | \$ 3,236 | \$ 2,818 |

With a view to reducing volatility in the SAR plan compensation expense, the Bank enters into total return swap contracts, the value of which is linked to the price of the Bank's shares. Changes in fair value of these derivative instruments partially offset the stock-based compensation expense over the period in which the swaps are in effect.

16 EMPLOYEE FUTURE BENEFITS

DESCRIPTION OF BENEFIT PLANS

The Bank has a number of funded defined benefit plans, including certain defined contribution portions. The benefit plans provide pension benefits to most of its employees. Its defined benefit pension plans are based on years of service and final average salary at retirement time.

The Bank offers other post-employment benefits to its employees such as a salary continuance plan during maternity leave and the payment of group insurance plan premiums during a disability period or maternity leave. In addition, certain retired employees have other retirement benefits, including health and life insurance.

TOTAL CASH PAYMENTS

Total cash payments for future employee benefits for 2011, consisting of cash contributed by the Bank to its funded pension plans, cash payments directly to beneficiaries for its unfunded other benefit plans and cash contributed to its defined contribution portions, amounted to \$16.0 million (\$17.3 million in 2010).

DEFINED BENEFIT PLAN MEASUREMENT DATES

The Bank measures its accrued benefit obligations and the fair value of plan assets for accounting purposes as at October 31 of each year. The most recent actuarial valuations were performed as at December 31, 2008 and at December 31, 2010 for two plans. The next required actuarial valuation for funding purposes will be as at December 31, 2011 for all funded plans.

DEFINED BENEFIT PLAN OBLIGATIONS

| | | 2011 | | 2010 |
|---|------------------|----------------|------------------|----------------|
| | PENSION PLANS | OTHER PLANS | PENSION PLANS | OTHER PLANS |
| Change in accrued benefit obligation | | | | |
| Accrued benefit obligation at beginning of year | \$413,218 | \$34,463 | \$346,107 | \$32,643 |
| Current service cost | 12,727 | 45 | 10,039 | 67 |
| Interest cost on accrued benefit obligation | 22,475 | 1,558 | 22,568 | 1,772 |
| Benefits paid | (18,988) | (1,397) | (20,306) | (1,477) |
| Employee contributions | 242 | - | 232 | - |

SIGNIFICANT ASSUMPTIONS

| | | 2011 | | 2010 |
|--|------------------|----------------|------------------|----------------|
| | PENSION PLANS | OTHER PLANS | PENSION PLANS | OTHER PLANS |
| Weighted average of assumptions | | | | |
| Accrued benefit obligation as at October 31: | | | | |
| Discount rate at end of year | 5.25% | 5.25% | 5.40% | 5.40% |
| Rate of compensation increase | 3.50% | 3.50% | 3.50% | 3.50% |
| Benefit costs for the years ended October 31: | | | | |
| Discount rate for the year | 5.40% | 5.40% | 6.50% | 6.50% |
| Expected long-term rate of return on plan assets | 7.25% | - | 7.25% | - |
| Rate of compensation increase | 3.50% | 3.50% | 3.50% | 3.50% |

ASSUMED HEALTH CARE COST TREND RATES AS AT OCTOBER 31.

| | 2011 | 2010 |
|---|------|------|
| Assumed annual rate of increase in the cost of health care benefits | 8.8% | 9.4% |
| Level to which it should decline and at which it is assumed to subsequently stabilize | 4.0% | 4.0% |
| Year that the rate is assumed to stabilize | 2019 | 2019 |

SENSITIVITY ANALYSIS

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects for 2011.

| | 1% INCREASE | 1% DECREASE |
|------------------------------------|-------------|-------------|
| Total of service and interest cost | \$ 134 | \$ (113) |
| Accrued benefit obligation | \$2,521 | \$(2,116) |

17 INCOME TAXES

FUTURE INCOME TAXES

Significant components of the Bank's future income tax assets and liabilities are as follows.

| | 2011 | 2010 |
|--------------------------------------|------------|------------|
| Future income tax assets | | |
| Allowances for loan losses | \$ 21,900 | \$ 22,068 |
| Premises and equipment | 10,668 | 15,168 |
| Provisions | 7,282 | 4,804 |
| Amount related deferred remuneration | 5,305 | 4,709 |
| Tax loss carryforwards | 3,222 | - |
| Software | - | 11,551 |
| Other temporary differences | 3,059 | 2,899 |
| | 51,436 | 61,199 |
| Future income tax liabilities | | |
| Accrued benefit assets-pension plans | (27,410) | (29,318) |
| Securitization and securities | (21,732) | (16,414) |
| Deferred charges | (17,149) | (15,640) |
| Derivatives | (16,110) | (8,118) |
| Software | (5,494) | - |
| Other temporary differences | (2,863) | (3,650) |
| | (90,758) | (73,140) |
| Future income taxes, net | \$(39,322) | \$[11,941] |

Net future income taxes are reported in other assets (note 9) and other liabilities (note 11) in the consolidated balance sheet.

| | 2011 | 2010 |
|---|----------------------|-----------------------|
| Future income tax assets Future income tax liabilities | \$ 4,160 (43,482) | \$ 29,579 (41,520) |
| | \$(39,322) | \$ (11,941) |

Income tax loss carryforwards, as at October 31, 2011 were \$11.2 million (nil in 2010).

INCOME TAX EXPENSE

Significant components of income tax expense are as follows.

| | 2011 | 2010 |
|---|----------|------------|
| Consolidated statement of income | | |
| Current income tax expense | \$15,140 | \$17,929 |
| Future income tax expense | | |
| Reversal of temporary differences | 21,095 | 23,753 |
| Tax rate changes | - | 587 |
| | 21,095 | 24,340 |
| | \$36,235 | \$42,269 |
| Consolidated statement of comprehensive income | | |
| Income taxes (recovery) related to change in unrealized gains (losses) on available-for-sale securities | \$ (117) | \$ 2,361 |
| Income taxes recovery related to reclassification of net gains on available-for-sale securities to net income | (1,002) | (902) |
| Income taxes (recovery) related to net change in value of derivatives designated as cash flow hedges | 7,405 | (6,343) |
| | \$ 6,286 | \$ [4,884] |
| Consolidated statement of changes in shareholders' equity | | |
| Income taxes on preferred share dividends and other | | |
| Current income tax expense | \$ 4,710 | \$ 4,710 |
| Current income tax benefit | (4,049) | (4,363) |
| | \$ 661 | \$ 347 |

17 INCOME TAXES (CONT'D)

RECONCILIATION WITH THE STATUTORY RATE

The reconciliation of income tax expense reported in the consolidated statement of income to the dollar amount of income taxes using the statutory rates is as follows.

| | | 2011 | | 2010 |
|---|----------|-------|----------|-------|
| | AMOUNT | | AMOUNT | |
| Income taxes at statutory rates | \$46,839 | 28.6% | \$50,027 | 30.3% |
| Change resulting from: | | | | |
| Income related to foreign credit insurance operations | (5,275) | (3.2) | (4,891) | (3.0) |
| Dividends and tax-exempt gains | (3,626) | (2.2) | (1,919) | (1.2) |
| Resolution of income tax exposures | - | - | (1,010) | (0.6) |
| Taxe rate changes | - | - | 587 | 0.4 |
| Other | (1,703) | (1.1) | (525) | (0.3) |
| Income taxes as reported in the consolidated | | | | |
| statement of income | \$36,235 | 22.1% | \$42,269 | 25.6% |

Income earned on foreign credit insurance operations would generally be taxed only upon repatriation to Canada. Since the Bank's management does not expect to repatriate income accumulated after July 27, 2006, no future income tax expense has been recognized on such income. Income taxes that would be payable if all unremitted earnings were repatriated are estimated at \$20.8 million as at October 31, 2011 (\$15.9 million as at October 31, 2010).

18 EARNINGS PER SHARE

Basic and diluted earnings per share for the years ended October 31 is detailed as follows.

| | 2011 | | 2010 |
|----|--|---|--|
| \$ | 127,489 12,436 | \$ | 122,941 12,122 |
| \$ | 115,053 | \$ | 110,819 |
| 23 | ,923,754 | 23 | 3,920,529 |
| \$ | 4.81 | \$ | 4.63 |
| \$ | 115,053 | \$ | 110,819 |
| 23 | ,923,754 19,067 | 23 | 3,920,529 16,938 |
| 23 | ,942,821 | 23 | 3,937,467 |
| \$ | 4.81 | \$ | 4.63 |
| | \$ 23 \$ \$ 23 23 23 | \$ 127,489 12,436 \$ 115,053 23,923,754 \$ 4.81 \$ 115,053 23,923,754 19,067 23,942,821 | \$ 127,489 \$ 12,436 \$ \$ 115,053 \$ 23,923,754 23 \$ 4.81 \$ \$ 115,053 \$ 23,923,754 23 19,067 23,942,821 23 |

The preferred shares were convertible into common shares at the Bank's option. However, on November 17, 2010, the Bank irrevocably renounced its right of conversion of its Class A preferred shares into common shares. In prior periods, these conversions were not taken into account in the calculation of diluted earnings per share because the Bank could settle such conversions in cash rather than common shares and, based on past experience, the Bank had opted for a cash settlement.

19 RELATED PARTY TRANSACTIONS

The Bank provides loans to directors and officers and their related companies. Loans to directors are granted under market conditions for similar risks and are measured at the exchange amount. Loans to officers consist mostly of term residential mortgage loans at posted rates less 2%, as well as personal loans and personal lines of credit at market rates less a discount based on the type and amount of the loan. Loans to related companies of directors and officers are granted under terms similar to those offered to arm's length parties. The interest earned on these loans is recorded under interest income in the consolidated statement of income. The outstanding balances of these loans are as follows.

| 2011 | 2010 |
|------------------------|--------------------|
| \$ 1,377 14.690 | \$ 1,159 15,699 |
| \$16,067 | \$16,858 |

In the normal course of business, the Bank also provides usual banking services to certain directors and officers, including bank accounts (deposits) under terms similar to those offered to arm's length parties.

20 FINANCIAL INSTRUMENTS – FAIR VALUE

The fair value of a financial instrument is defined as the theoretical amount of consideration for a financial instrument that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. Quoted market prices are not available for a portion of the Bank's financial instruments. As a result, for these instruments, the fair values presented are estimates derived using present value or other valuation techniques and may not be indicative of the net realizable value.

CLASSIFICATION OF FAIR VALUE MEASUREMENTS IN THE FAIR VALUE HIERARCHY

CICA Handbook Section 3862 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Bank's market assumptions. These two types of inputs create the following fair value hierarchy:

- Level 1-Quoted prices in active markets for *identical* financial instruments.
- Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar financial instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3-Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are *unobservable*.

The amounts in the following tables present the fair value of financial instruments of the Bank based on the valuation methods and assumptions as set out below. In addition, pertaining only to the financial instruments recorded at fair value in the financial statements, the tables show their valuation levels in the fair value hierarchy.

20 FINANCIAL INSTRUMENTS - FAIR VALUE (CONT'D)

(in millions of dollars)

| | | | FAVOURABLE | FAIR VALUE HIERARCHY LEVEL OF FINANCIAL INSTRUMENTS RECORDED AT FAIR VALUE ⁽¹⁾ | | |

2010

DETERMINING FAIR VALUE

For assets and liabilities carried at fair value, the Bank measures such value as follows.

When available, the Bank generally uses quoted market prices to determine fair value and classifies such items in Level 1.

If quoted market prices are not available, fair value is based on internally developed valuation techniques that use, where possible, current market-based or independently sourced market inputs, such as interest rates, exchange rates and option volatility. Instruments valued using internal valuation techniques are classified according to the lowest level input or value driver that is significant to the fair value measurement. Thus, an instrument may be classified in Level 3 even though some significant inputs may be observable.

Where available, the Bank may also make use of quoted prices for recent trading activity in positions with the same or similar characteristics to that being valued. The frequency and size of transactions and the amount of the bid-ask spread are among the factors considered in determining the liquidity of markets and the relevance of observed prices from those markets. If relevant and observable prices are available, those valuations would be classified in Level 2. If prices are not available, other valuation techniques are used and items are classified in Level 3. For these assets and liabilities, the inputs used in determining fair value may require significant management judgment. Due to the inherent uncertainty in these estimates, the values may differ significantly from those that would have been used if an active market had existed for the financial instruments.

The following section describes the valuation methodologies used by the Bank to measure certain significant financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified. Where appropriate, the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Securities purchased under reverse repurchase agreements and obligations related to securities sold under repurchase agreements

Given that quoted prices are not available for such financial instruments, fair value is determined using a discounted cash flow technique. Cash flows are estimated based on the terms of the contract and discounted using appropriate market rates. Since these instruments are recorded at amortized cost, they are not classified in the fair value hierarchy.

Securities accounts

When available, the Bank uses quoted market prices to determine the fair value of securities; such instruments are classified in Level 1 of the fair value hierarchy; for example exchange-traded equity securities. For bonds traded over the counter, the Bank generally determines fair value using internal valuation techniques or prices obtained from independent vendors. Where available, the Bank may also use quoted prices for recent trading activity of assets with similar characteristics to the bond being valued. Securities priced using such methods are generally classified in Level 2. However, less liquid securities may be classified in Level 3 given that the Bank must then determine the parameters related to certain significant value drivers, including liquidity premiums and credit spreads.

Loans

Quoted market prices in an active market are not available for these financial instruments. As a result, the fair value of loans is estimated by discounting cash flows adjusted to reflect prepayments, if any, at the prevailing market interest rates for new loans with substantially similar terms. For certain variable rate loans subject to frequent rate revisions and loans with indeterminate maturities, the fair value is deemed to represent the carrying amount. Since these instruments are recorded at amortized cost, they are not classified in the fair value hierarchy.

Other assets

Other assets consist primarily of cheques and other items in transit, accrued interest receivable and certain retained interests related to securitization transactions. Quoted market prices in an active market are not available for these financial instruments.

The fair value of cheques and other items in transit and accrued interest receivable is determined using the discounted cash flow method. Since these instruments are all recorded at amortized cost, they are not classified in the fair value hierarchy.

The fair value of retained interest related to securitization transactions is calculated based on a discounted net value analysis that factors in the time value of money and anticipated rates of prepayment. The retained interests are classified in Level 3. More details regarding these interests are provided in note 6, including sensitivity analysis.

Derivatives

The fair value of over-the-counter derivatives is calculated using prevailing market prices for instruments with similar characteristics and maturities, based on a discounted net value analysis or an appropriate pricing model that factors in the current and contractual prices of the underlying instruments, the time value of money, the yield curve and volatility factors. These derivatives are classified in Level 2 or Level 3 depending on whether the significant inputs to those pricing models include observable or unobservable inputs. Also, certain exchange-traded derivatives, whose fair value is based on quoted market prices, are classified in Level 1 of the fair value hierarchy.

20 FINANCIAL INSTRUMENTS - FAIR VALUE (CONT'D)

Deposits

Quoted market prices in an active market are not available for these financial instruments. As a result, the fair value of fixed rate deposits is estimated using discounted cash flows based on prevailing market interest rates for deposits with substantially similar terms. The fair value of deposits without stated maturities or variable rate deposits is deemed to represent their carrying amount. Since these instruments are primarily recorded at amortized cost, they are not classified in the fair value hierarchy.

Obligations related to securities sold short

When available, the Bank uses quoted market prices to determine the fair value of obligations related to securities sold short; such instruments are classified in Level 1. For bonds traded over the counter, the Bank generally determines fair value using internal valuation techniques or prices obtained from independent vendors. Where available, the Bank may also use quoted prices for recent trading activity of assets with similar characteristics to the bond being valued. Securities priced using such methods are generally classified in Level 2.

Subordinated debt

Quoted market prices in an active market are not available for these financial instruments. As a result, the fair value of subordinated debt is estimated using discounted cash flows based on prevailing market interest rates for similar issues or rates currently offered for debt securities with the same term to maturity. Since these instruments are recorded at amortized cost, they are not classified in the fair value hierarchy.

LEVEL TRANSFERS AND RECLASSIFICATION

There were no significant changes in fair value measurement methods during the year.

CHANGE IN LEVEL 3 FAIR VALUE CATEGORY

The following tables show the changes in the Level 3 of the fair value hierarchy for the years ended October 31, 2011 and 2010. The Bank classifies financial instruments in Level 3 of the fair value hierarchy when there is reliance on at least one significant unobservable input to the valuation model. In addition to these unobservable inputs, the valuation models for Level 3 financial instruments typically rely on a number of inputs that are observable either directly or indirectly. Accordingly, the gains and losses shown below include changes in fair value related to both observable and unobservable inputs.

SENSITIVITY ANALYSIS OF LEVEL 3 FINANCIAL INSTRUMENTS

As at October 31, 2011, retained interests related to securitization activities were included within Level 3 other assets for a fair value of \$122.8 million. The sensitivity analysis for these instruments is disclosed in note 6. For other instruments, when other reasonably possible alternative assumptions were available for the valuation models, the Bank used these assumptions to recalculate the fair value of these instruments, resulting in a potential increase or decrease in total Level 3 fair value of \$10.2 million.

21 FINANCIAL INSTRUMENTS - RISK MANAGEMENT

The Bank is exposed to various types of risks owing to the nature of the business activities it pursues. To ensure that all of the significant risks to which the Bank could be exposed are taken into consideration, an Integrated Risk Management Framework has been developed to provide for oversight of risk assessment and control. Risk management is conducted according to tolerance levels established by management committees and approved by the Board of Directors through its committees.

In order to manage the risks associated with financial instruments, including loan and deposit portfolios, securities and derivatives, the Bank has implemented policies prescribing how various risks are to be managed. In practice, management closely monitors various risk limits, as well as a number of other indicators. Oversight of operations is performed by groups independent of the business lines.

The main risks to which the Bank is exposed in respect of financial instruments are set out below.

- Credit risk
- Liquidity and funding risk
- Market risk
 - Interest rate risk
 - Foreign exchange risk
 - Equity risk

A) CREDIT RISK

The use of financial instruments, including derivatives, can result in credit risk exposure representing the risk of financial loss arising from a counterparty's inability or refusal to fully honour its contractual obligations.

The credit risk management policies adopted by the Bank aim at assessing this risk. These policies cover the approval of credit applications by the line of authority concerned, attribution of risk ratings, management of impaired loans, establishment of provisions and risk-based pricing. With respect to diversification, the credit policy sets the guidelines intended to limit credit concentration by counterparty and industry sector, and identifies sectors that are considered riskier and thus to be avoided. The policies are periodically reviewed and approved by the Board of Directors' Risk Management Committee.

21 FINANCIAL INSTRUMENTS-RISK MANAGEMENT (CONT'D)

Acting through a risk management group independent of the business lines, the Bank monitors its financial instrument portfolios in terms of both quality and quantity through: [i] mechanisms and policies governing the review of various types of files; [ii] risk rating systems, and [iii] pricing analysis. Note 5 to these consolidated financial statements provides additional information on the Bank's loan portfolios.

The majority of the Bank's credit concentration in derivatives is with financial institutions, primarily Canadian banks. Credit risk in derivative transactions arises from a potential counterparty default on its contractual obligations when one or more transactions have a positive replacement cost for the Bank. Replacement cost represents what it would cost to replace transactions at prevailing market rates in the event of a default. The credit equivalent amount arising from a derivative transaction is defined as the sum of the replacement cost plus an estimated amount reflecting the potential change in market value of the transaction through to maturity. Note 22 provides additional information on credit exposure.

Derivative-related credit risk is generally managed using the same credit approval, limit and monitoring standards as those used for managing other credit transactions. Moreover, the Bank negotiates derivative master netting agreements with counterparties with which it contracts. These agreements reduce credit risk exposure in the event of a default by providing for the simultaneous netting of all transactions with a given counterparty. These contracts also allow the Bank to require the counterparty to pay or guarantee the current market value of its positions when the value exceeds a given threshold.

The amount that best represents the Bank's maximum exposure to credit risk as at October 31, without factoring in any collateral held or other credit enhancements, represents the sum of financial assets in the Bank's consolidated balance sheet, plus credit-related commitments as set out below.

| (in millions of dollars) | 2011 | 2010 |
|--|----------|----------|
| Financial assets, as stated in the consolidated balance sheet ⁽¹⁾ | \$23,791 | \$23,116 |
| Credit-related commitments | | |
| Personal credit facilities | 1,624 | 1,403 |
| Credit card lines | 1,170 | 1,004 |
| Undrawn amounts under approved credit facilities | 2,603 | 2,469 |
| | \$ 5,397 | \$ 4,876 |
| Total | \$29,188 | \$27,992 |

(1) Excludes equity securities.

Concentration of credit risk

Concentration of credit risk may exist where a number of counterparties engaged in similar activities are located in the same geographic area or have comparable economic characteristics. Their ability to meet contractual obligations could be compromised by changing economic, political or other conditions. The Bank's operations are located in Canada.

The following table shows loans based on location as at October 31:

| | 2011 | 2010 |
|---|-----------|-----------|
| Québec Other Canadian provinces ⁽¹⁾ | 64% 36 | 63% 37 |
| Total | 100% | 100% |

(1) Mainly in the province of Ontario.

No single industry segment accounted for more than 3% (3% in 2010) of the total loans and customers' liabilities under acceptances.

Guarantees held in respect of loan portfolios

Nearly 50% of the Bank's residential mortgage loan portfolio is insured by CMHC. Moreover, the Bank holds guarantees in respect of the real estate property for the other conventional mortgage loans. In addition, the value of such loans never exceeds 80% of the property's initially estimated value, in accordance with statutory requirements.

Nearly 72% of the Bank's personal loan portfolio consists of investment loans, home equity lines of credit and point-of-sale financing loans. Loan underwriting for these loans is subject to a process which allows for the assessment of client credit risk. In addition, the Bank has defined and requires eligible collateral. Specifically, investment loans are collateralized by qualified Canadian mutual funds, home equity lines of credit are collateralized by real estate assets and point-of-sale financing loans are collateralized by fixed assets. Also, more than 10% of the Bank's personal loan portfolio consists of student loans and loans granted under the Immigrant Investor program, which are guaranteed by the federal or provincial government.

Commercial mortgage loans are secured by specific assets, including construction projects, commercial properties, shopping centers, office buildings, plants, warehouses and industrial condominiums. In general, the value of these loans does not exceed 60% to 75% of the initially estimated value of the property, depending on the nature of the loan.

Certain guarantees are also held for other personal and commercial loans in accordance with standard banking practices.

2011

2010

Other guarantees held

When entering into trading activities such as reverse repurchase agreements and derivative transactions, the Bank requires counterparties to pledge collateral that will protect the Bank from losses in the event of the counterparty's default. Collateral transactions are conducted under terms that are usual and customary in standard trading activities. The following are examples of general terms and conditions on collateral assets that the Bank may sell, pledge or repledge.

- The risks and rewards of the pledged assets reside with the pledgor.
- The pledged asset is returned to the pledgor when the necessary conditions have been satisfied.
- The right of the pledgee to sell or repledge the asset is dependent on the specific agreement under which the collateral is pledged.
- If there is no default, the pledgee must return the comparable asset to the pledgor upon satisfaction of the obligation.

As at October 31, 2011 the approximate market value of collateral pledged to the Bank in connection with assets purchased under reverse repurchase agreements was \$318.8 million (\$803.9 million as at October 31, 2010).

B) LIQUIDITY AND FUNDING RISK

Liquidity and funding risk represents the possibility that the Bank may not be able to gather sufficient cash resources, when required and on reasonable conditions, to meet its financial obligations.

The Bank's overall liquidity risk is managed by Corporate Treasury with oversight by the Management Committee, in accordance with the policies governing cash resources, funding and collateral management. The main purpose of these policies is to ensure that the Bank has sufficient cash resources to meet its current and future financial obligations, under both normal and stressed conditions.

The Bank monitors cash resources daily and ensures that liquidity indicators are within established limits. Liquidity risk management pays particular attention to deposit and loan maturities, as well as to funding availability and demand when planning financing. The Bank maintains a reserve of unencumbered liquid assets that are readily available to face contingencies. It defines its cash requirements based on scenarios evaluating required liquid assets necessary to cover pre-determined rates of withdrawal of wholesale financing and retail deposits. The Bank strives to maintain a stable volume of base deposits originating from its retail and brokerage clientele, as well as well-diversified funding sources. The Bank monitors guidelines on funding sources at the management and board level. Funding strategies also include loan securitization and the issuance of equity or debt instruments through capital markets. A liquidity contingency plan is prepared and reviewed on a regular basis. It provides a detailed action plan that would enable the Bank to fulfill its obligations in the event of an internal or external liquidity crisis.

Contractual maturities of financial liabilities

The following table shows the principal obligations related to financial liabilities by contractual maturity.

| | | | | | 2011 |
|--|----------------------|-----------------|-----------------|-----------------|--------------|
| | | | TERM | | |
| | DEMAND AND NOTICE | UNDER 1 YEAR | 1 TO 5 YEARS | OVER 5 YEARS | TOTAL |

| | \$7,414,995 | \$7,386,475 | \$7,031,109 | \$26,464 | \$21,859,043 |

TERM DEMAND AND NOTICE UNDER 1 YEAR 1 TO 5 YEARS OVER 5 YEARS TOTAL Deposits \$7,012,644 \$5.534.012 \$7,082,806 \$18,268 \$19.647.730 Obligations related to securities sold short 1,362,336 1,362,336 Obligations related to securities sold under repurchase agreements 60.050 60 050 Subordinated debt 150,000 150,000 Derivatives^[1] 6,086 8.595 (346)14,335 \$7,012,644 \$7,112,484 \$17,922 \$21,234,451 \$7.091.401

(1) The obligations related to derivatives represent solely the theoretical payments related to derivatives designated as cash flow hedges and used for interest rate risk management whose net fair values were negative as at October 31. The notional amounts associated with the derivatives are summarized by maturity in note 22.

The Bank is also exposed to liquidity risk when it contracts credit commitments. As at October 31, 2011, these commitments amounted to approximately \$2.6 billion (\$2.5 billion as at October 31, 2010), excluding personal credit facilities and credit card lines since revocable at the Bank's option.

21 FINANCIAL INSTRUMENTS - RISK MANAGEMENT (CONT'D)

C) MARKET RISK

Market risk represents the financial losses that the Bank could incur following unfavourable fluctuations in the value of financial instruments subsequent to changes in the underlying factors used to measure them, such as interest rates, exchange rates or equity prices. Exposure to market risk arising from trading, investment, financing and asset and liability management activities is mainly monitored by notional limits, stress testing and various other sensitivity measures, such as value at risk (VaR).

Interest rate risk

Asset and liability management activities are designed to control structural interest rate risk, which corresponds to the potential negative impact of interest rate movements on the Bank's revenues and economic value. This risk is mainly attributable to differences in maturity dates or re-pricing dates of balance sheet and off-balance sheet items along with the options embedded in certain banking products, notably clauses on prepayment, deposit redemption clauses. To manage this risk, various treasury and derivative instruments, mainly interest rate swaps, futures and options, are used to modify the interest rate characteristics of the underlying instruments in the balance sheet and to cover the inherent risk of options embedded in loan and deposit products. The Bank periodically assesses the effect on the economic value of common shareholders' equity and on its net interest income of a sudden and sustained 1% parallel change of the interest rate curve. The table below presents the estimated effect of such a change as at October 31.

The estimates are based on a number of assumptions and factors, consistent with the guidelines approved by the Management Committee, which include:

- Floor levels for deposit liabilities;
- For net interest income simulations, the renewal of matured loans and deposits at current market terms;
- On- and off-balance sheet assets and liabilities are generally considered to mature on the earlier of their contractual re-pricing or maturity date.

Maturity assumptions

Assets, liabilities and equity are shown at the earlier of the date of maturity or contractual revaluation while taking into consideration estimated redemptions or prepayments, except for the following:

- Deposits for which the interest rates are not indexed on a specific rate and which can be non-sensitive to changes in market rates are classified based on the historical trends in balances;

- Subordinated debt for which interest rates can be revised at a future date are classified at the re-pricing date;

- Preferred shares are classified using the date on which they become redeemable.

21 FINANCIAL INSTRUMENTS-RISK MANAGEMENT (CONT'D)

Foreign exchange risk

Foreign exchange risk is the losses that the Bank may incur subsequent to adverse exchange rate fluctuations. It originates mainly from foreign exchange positions held by the Bank to support the offering of products and services in currencies other than the Canadian dollar, trading operations and, to a lesser extent, mismatches in currencies of balance sheet and off-balance sheet assets and liabilities, as well as mismatches in receipts and payments of funds in foreign currencies. This risk is monitored using notional limits and other sensitivity analysis for trading operations. As at October 31, financial instruments denominated in U.S. dollars are detailed below.

| (in thousands of Canadian dollars) | 2011 | 2010 |
|--|-----------|-----------|
| Assets | | |
| Cash and Securities | \$ 92,090 | \$142,833 |
| Loans | 81,332 | 82,738 |
| Other | 23,711 | 26,980 |
| | \$197,133 | \$252,551 |
| Liabilities | | |
| Deposits | \$175,393 | \$150,697 |
| Obligations related to securities sold short | 22,173 | 99,983 |
| Other | 278 | 235 |
| | \$197,844 | \$250,915 |
| Net exposure | \$ (711) | \$ 1,636 |

In addition, U.S. dollar exposure related to derivatives is limited as these contracts are bought and sold mainly to meet specific customer needs. As at October 31, the effect of a sudden 5% change in foreign exchange rates would have no significant impact on net income and shareholder's equity.

Deposit assets and deposit liabilities denominated in other foreign currencies, primarily in euros, amount to \$23.3 million (\$10.8 million in 2010) and \$12.7 million (\$5.6 million in 2010) respectively. Currencies other than U.S. dollars are generally bought and sold solely to meet specific customer needs. As a result, the Bank has limited exposure to these currencies.

Equity risk

Equity risk is the financial losses that the Bank may incur subsequent to adverse fluctuations in certain equity prices or the stock market in general. The Bank's equity positions consist primarily of Canadian publicly traded securities and, as a result, portfolio sensitivity mainly correlates to Canadian stock market performance. A portion of the Bank's equity positions is used to hedge index-linked deposits. The residual portion represents less than 3% (less than 3% in 2010) of the total securities portfolio. A fluctuation in the Canadian stock market of 10% could have a \$5.6 million impact on the Bank's shareholders' equity.

22 DERIVATIVES AND HEDGING

In the normal course of business, the Bank enters into various contracts and commitments in order to protect itself against the risk of fluctuations in interest rates, foreign exchange rates and indexes used to determine the return of index-linked deposits, as well as to meet its customers' demands and to earn trading income, as described below.

The various derivatives listed in the tables below are as follows:

- i) Interest rate swaps involve the exchange of fixed and floating interest payment obligations based on a predetermined notional amount for a specified period of time. Foreign exchange swaps involve the exchange of the principal and fixed or floating interest payments in different currencies. Cross-currency interest rate swaps involve the exchange of both the principal amount and fixed and floating interest payment obligations in two different currencies over a given period.
- ii) Forward rate agreements are contracts fixing a future interest rate to be paid or received, calculated on a notional principal amount with a specified maturity commencing at a specified future date.
- iii) Options are agreements between two parties in which the writer of the option grants the buyer the right, but not the obligation, to buy or to sell, at or by a specified date, a specific amount of a financial instrument at a price agreed upon when the agreement is entered into. The writer receives a premium for selling this instrument.
- iv) Futures are future commitments to purchase or deliver a financial instrument on a specified future date at a specified price. Futures are traded in standardized amounts on organized exchanges and are subject to daily cash margining.
- v) Foreign exchange forward contracts are commitments to purchase or sell foreign currencies for delivery at a specified date in the future at a pre-determined rate.

The following tables present the notional amounts associated with the derivatives. The amounts are not indicative of the potential gain or loss related to the credit or market risk of these instruments.

IUIAL

 Include derivatives used in trading operations to meet customer demands and to earn trading income as well as derivatives used to manage the Bank's risk exposures that do not qualify for hedge accounting.
 Excluding accrued interest.

INFORMATION REGARDING HEDGING RELATIONSHIPS

Financial instruments designated as hedging instruments

The swap contracts designated as hedging instruments are used by the Bank primarily for purposes of balance sheet matching and minimizing volatility in net interest income. The value of such swap contracts can vary significantly. Accordingly, changes in fair value of swap contracts designated as cash flow hedging instruments could result in significant changes in accumulated other comprehensive income, in shareholders' equity.

In addition, certain non-derivative instruments are designated and qualify for hedge accounting. The Bank applies hedge accounting to minimize volatility in other income caused by changes in foreign exchange rates.

The following table presents the notional amounts of derivative and non-derivative contracts designated as hedging instruments.

| | | 2011 | | 2010 |
|----------------------------|-------------|------------|-------------|-------------|
| | CASH FLOW | FAIR VALUE | CASH FLOW | FAIR VALUE |
| | HEDGES | HEDGES | HEDGES | HEDGES |
| Derivative contracts | \$7,101,500 | \$805,250 | \$4,296,000 | \$2,158,850 |
| Non-derivative instruments | \$ – | \$ 17,360 | \$ - | \$ 18,194 |

Ineffective portions of hedging relationships

The following table shows the ineffective portions of the cumulative changes in fair value of hedging instruments recognized in the consolidated statement of income.

| | 2011 | 2010 |
|-------------------|---------|---------|
| Cash flow hedges | \$(171) | \$(593) |
| Fair value hedges | 422 | 161 |
| | \$ 251 | \$[432] |

Other information regarding hedging relationships

Net deferred gains of \$6.8 million (\$7.6 million as at October 31, 2010), included in accumulated other comprehensive income as at October 31, 2011, are expected to be reclassified to the consolidated statement of income over the next twelve months.

The maximum term of cash flow hedging relationships in respect of future transactions was eight years as at October 31, 2011 (nine years in 2010).

CREDIT EXPOSURE

| (in millions of dollars) | | | 2011 | | | 2010 |
|------------------------------------|------------------------------------|---|--|---------------------|--------------------------------|-----------------------------|
| | REPLACEMENT COST ⁽¹⁾ | CREDIT EQUIVALENT AMOUNT ⁽²⁾ | RISK- WEIGHTED AMOUNT ^[3] | REPLACEMENT COST | CREDIT EQUIVALENT AMOUNT | RISK- WEIGHTED AMOUNT |
| Interest rate contracts | | | | | | |

[1] Represents favourable fair market value, excluding the impact of master netting agreements. Exchange-traded instruments and options written

are excluded since they do not constitute a credit risk. (2) Includes (i) the total positive replacement value of all outstanding contracts and (ii) an amount representing the assessed potential credit risk.

(3) Using guidelines issued by OSFI.

Note 21 hereto provides additional disclosures on the credit risk related to derivatives and how it is assessed.

23 INCOME RELATED TO FINANCIAL INSTRUMENTS HELD-FOR-TRADING

Financial instruments held-for-trading, including held -fort-rading securities, derivatives not designated in hedge relationships, and obligations related to securities sold short are measured at fair value, with gains and losses recognized in the consolidated statement of income.

Management can elect to designate financial instruments as held-for-trading instruments, with changes in fair value recorded in income, provided that such designations meet specific criteria. Certain securities and retained interests related to securitization transactions were designated as held-for-trading in order to significantly reduce a recognition inconsistency that would otherwise have arisen from recognizing gains and losses on different bases. These financial instruments are used as part of the Bank's overall asset-liability management and provide an economic hedge for other financial instruments that are measured at fair value. Gains and losses on these instruments are therefore generally offset by changes in value of other financial instruments.

23 INCOME RELATED TO FINANCIAL INSTRUMENTS HELD-FOR-TRADING (CONT'D)

The following table presents the income related to these instruments. Income comprises net interest income and other income included in income from treasury and financial market operations, income from brokerage operations as well as securitization income. Income excludes underwriting fees and commissions on securities transactions.

| | | 2011 | | 2010 |
|--|----------------------|-----------------------------------|----------------------|-----------------------------------|
| | FIN | ANCIAL INSTRUMENTS | | FINANCIAL INSTRUMENTS |
| | HELD-FOR- TRADING | DESIGNATED AS HELD-FOR-TRADING | HELD-FOR- TRADING | DESIGNATED AS HELD-FOR-TRADING |
| Net interest income | \$ 12,762 | \$32,486 | \$ 5,018 | \$49,929 |
| Other income included in: | | | | |
| Securitization income | (8,362) | (3,463) | (31,964) | 23,841 |
| Income from brokerage operations | 11,963 | - | 18,616 | - |
| Income from treasury and financial market operations | 5,819 | - | 4,702 | 17 |
| | \$ 9,420 | \$ (3,463) | \$ (8,646) | \$23,858 |
| Total | \$ 22,182 | \$29,023 | \$ (3,628) | \$73,787 |

24 COMMITMENTS AND GUARANTEES

CREDIT-RELATED COMMITMENTS

The Bank uses certain off-balance sheet credit instruments as a means of meeting the financial needs of its customers. Undrawn amounts under approved credit facilities represent a commitment to make credit available in the form of loans or other credit instruments for specific amounts and maturities, subject to specific conditions.

Documentary letters of credit are documents issued by the Bank on behalf of customers, authorizing a third party to draw drafts to a stipulated amount under specific conditions. These letters are guaranteed by the underlying shipments of goods.

The amounts of credit-related commitments represent the maximum amount of additional credit that the Bank could be obliged to extend. These amounts are not necessarily indicative of credit risk as many of these commitments are contracted for a limited period of usually less than one year and will expire or terminate without being drawn upon.

| | 2011 | 2010 |
|---|-------------|-------------|
| Undrawn amounts under approved credit facilities ⁽¹⁾ | \$2,603,217 | \$2,468,800 |
| Documentary letters of credit | \$ 4,358 | \$ 6,670 |

(1) Exclude personal credit facilities totalling \$1.6 billion (\$1.4 billion as at October 31, 2010) and credit card lines amounting to \$1.2 billion (\$1.0 billion as at October 31, 2010) since they are revocable at the Bank's option.

GUARANTEES

Standby letters of credit and performance guarantees

In the normal course of its operations, the Bank offers its customers the possibility of obtaining standby letters of credit and performance guarantees. These represent irrevocable assurances that the Bank will make payments in the event that clients cannot meet their obligations to third parties. The term of these guarantees varies according to the contracts and normally does not exceed one year. The Bank's policy for requiring collateral security with respect to these instruments is similar to its policy for loans. No specific provision is currently recorded with regard to these guarantees. The maximum potential amount of future payments under these guarantees totalled \$146.8 million as at October 31, 2011 (\$175.2 million in 2010).

Derivatives

To meet certain customers' hedging needs against foreign exchange rate fluctuations, the Bank sells put options (foreign exchange contracts), which are contractual agreements under which the Bank grants customers the right, but not the obligation to sell, by or on a set date, a specified amount of foreign currencies at a predetermined price. The term of these options does not exceed 12 months. No specific provision is recorded with respect to these derivatives. The maximum potential amount of future payments under these derivatives, corresponding to the notional value of outstanding contracts, totalled \$213.3 million as at October 31, 2011 (\$201.8 million in 2010).

Collateral received and pledged as security

As at October 31, 2011, the approximate market value of collateral pledged to the Bank that it can sell or re-pledge as security amounted to \$318.8 million (\$803.9 million as at October 31, 2010). This collateral pledged to the Bank as security was obtained under reverse repurchase and securities borrowing agreements. All collateral received was pledged as security in connection with obligations related to securities sold short.

Other indemnification agreements

In the normal course of its operations, the Bank provides indemnification agreements to counterparties in certain transactions such as purchase contracts, service agreements and sales of assets. These indemnification agreements require the Bank to compensate the counterparties for costs incurred as a result of changes in laws and regulations (including tax legislation) or as a result of litigation claims or statutory sanctions that may be suffered by the counterparty as a consequence of the transaction. The Bank also indemnifies directors and officers, to the extent permitted by law, against certain claims that may be made against them as a result of their being, or having been, directors or officers at the request of the Bank. The terms of these indemnification agreements vary based on the contract. The nature of the indemnification agreements prevents the Bank from making a reasonable estimate of the maximum potential amount it could be required to pay to counterparties. Historically, the Bank has not made any significant payments under such indemnification agreements. No amount has been accrued with respect to these indemnification agreements.

LEASE COMMITMENTS, SERVICE CONTRACTS FOR INFORMATION TECHNOLOGY SERVICES AND OTHER CONTRACTS

As at October 31, 2011, minimum future commitments under leases, service contracts for outsourced technology services and other contracts are as follows.

| | PREMISES | INFORMATION TECHNOLOGY SERVICE CONTRACTS ^[1] | OTHER | TOTAL |
|------------|-----------|--|----------|-----------|
| 2012 | \$ 38,481 | \$ 44,788 | \$ 3,247 | \$ 86,516 |
| 2013 | 36,243 | 40,281 | 3,247 | 79,771 |
| 2014 | 33,855 | 32,888 | 2,775 | 69,518 |
| 2015 | 31,663 | 32,014 | 1,178 | 64,855 |
| 2016 | 27,766 | 32,754 | 212 | 60,732 |
| Thereafter | 75,870 | 6,300 | - | 82,170 |
| Total | \$243,878 | \$189,025 | \$10,659 | \$443,562 |

(1) The Bank may terminate certain major service contracts in certain circumstances.

PLEDGED ASSETS

In the normal course of its operations, the Bank pledges financial assets presented in the consolidated balance sheet. This collateral security is pledged under the usual terms that provide, among other things, that the Bank bear the risks and rewards related to the collateral security and the pledged assets be returned to the Bank when the terms and conditions requiring them to be pledged as security cease to apply.

The following table details the granted guarantees.

| | 2011 | 2010 |
|---|-------------|-----------|
| Pledged assets to participate in clearing and payment systems | \$320,348 | \$337,376 |
| Pledged assets for obligations related to securities sold under | | |
| repurchase agreements and for securities borrowed | 1,130,896 | 179,334 |
| Pledged assets for obligations related to derivatives | | |
| in a liability position | 96,785 | 95,362 |
| | \$1,548,029 | \$612,072 |
| Assets pledged are detailed as follows: | | |
| Securities | \$1,438,807 | \$354,040 |
| Residential mortgage loans | 109,222 | 258,032 |
| | \$1,548,029 | \$612,072 |

25 VARIABLE INTEREST ENTITIES

The Bank analyzes the interests it holds in certain entities to determine whether they satisfy the definition of a variable interest entity (VIE), and whether the Bank is the primary beneficiary and must therefore consolidate them. The Bank normally considers its single-seller and multi-seller securitization conduits as VIEs. However, these conduits are not consolidated, as these special purpose entities are specifically excluded from the scope of the accounting standard or because the Bank is not their primary beneficiary. More details regarding transactions with these entities are provided in note 6.

26 CONTINGENCIES

LITIGATION

Marcotte v. Banks class action

On June 11, 2009, the Superior Court of Québec granted a class action against ten Canadian financial institutions, including Laurentian Bank, with regard to mark-ups charged by the banks to their credit card holders on translation of foreign currency transactions into Canadian dollars. The judgment ordered the Bank to repay the mark-ups it collected, with interest, plus an additional amount of compensation. Together with its Canadian financial institution co-defendants, the Bank submits that the judgment contains several errors of fact and law that are sufficiently decisive as to invalidate the judgment, and therefore moved to appeal. Given that, in the current circumstances, the Bank is unable to determine the outcome of this litigation, no provision has been set aside.

Other

The Bank and its subsidiaries are also involved in various other legal actions and claims, including some with regulatory bodies. Many of these disputes are related to loans granted by the Bank and are in reaction to steps taken by the Bank to collect delinquent loans and realize the underlying collateral. Certain claims have also been brought against the Bank, particularly with respect to trustee operations related to portfolio administration and the charging of certain bank fees. Management considers that adequate provisions have been set aside to cover any potential losses and any amounts that might not be recoverable from insurance companies, as the case may be, in connection with these actions.

27 SEGMENTED INFORMATION

The Bank determines its reportable segments based on the different services it provides to individuals, businesses, financial intermediaries and institutional clients. The four business segments of the Bank are: Retail & SME-Québec, Real Estate & Commercial, B2B Trust, and Laurentian Bank Securities and Capital Markets.

The Retail & SME-Québec segment provides a full range of savings, investment and financing products, and transactional products and services offered through its direct distribution network, which includes branches, electronic networks, a call centre and a mobile sales force. This business segment also offers Visa credit card services, insurance products and trust services. As well, it offers a wide range of commercial financial services to small and medium-sized enterprises in Québec.

The Real Estate & Commercial segment provides real estate financing throughout Canada, commercial financing in Ontario and Quebec, as well as foreign exchange and international services.

The B2B Trust segment supplies banking and financial products to independent financial advisors and non-bank financial institutions across Canada.

Laurentian Bank Securities and Capital Markets segment consists of the Laurentian Bank Securities Inc. subsidiary and the Bank's capital market activities.

A fifth "Other segment" encompasses the Bank's corporate functions, including Corporate Treasury and securitization activities.

2011

2010

Results for the Bank's segments are based on internal financial reporting systems and are consistent with the accounting principles followed in the preparation of the Bank's consolidated financial statements, except for loan securitization. As noted in Note 6, the Bank securitizes residential mortgage loans held by the Retail & SME-Québec and B2B Trust segments in transactions that are accounted for as sales. For the purpose of segmented reporting, Retail & SME-Québec and B2B Trust account for the transactions as though they are financing arrangements. Accordingly, the interest income earned on the loans sold net of the funding costs is recorded in net interest income and impairment related to these loans is charged to provision for loan losses. This accounting is reversed in the Other segment and the gain recognized on sale together with income earned on the retained interests, net of loan losses incurred, are included in other income.

All transactions between business segments are conducted on an arm's length basis, with inter-segments revenues and costs being eliminated in the Other segment. Transfer pricing regarding the funding of segments' assets and liabilities is based on funding costs which best reflect the nature and maturities of these items. Income and expenses directly associated with each segment are included in determining business segment performance. Corporate expenses are generally allocated pro-rata to each business segment.

(1) Assets are disclosed on an average basis, as this measure is most relevant to a financial institution.

(2) The 2011 and 2010 effective tax rates were influenced by a number of items – see note 17 related to income taxes.
 (3) Non-interest expenses in 2011 include a \$7.7 million charge for the termination in 2012 of the existing distribution agreement of IA Clarington funds in the other segment and a \$0.5 million charge related to integration costs of the MRS Companies in the B2B Trust segment (see note 28).

28 SUBSEQUENT EVENTS AND RELATED COSTS

On November 16, 2011, the Bank completed the acquisition of the M.R.S. Trust Company and M.R.S. Inc. (together, the MRS Companies) for cash consideration of approximately \$199.5 million, including a premium of \$50.0 million over the net book value of the acquired companies. The MRS Companies, previously part of the Mackenzie Financial Corporation, provide trust and administrative services to dealers, advisors and investors in Canada. The MRS Companies will be part of the B2B Trust reporting segment; goodwill associated with this transaction will be allocated to this segment. The allocation of the purchase price for the MRS Companies will be subject to refinement as the Bank completes the valuation of the assets acquired and liabilities assumed.

On October 14, 2011, the Bank and Mackenzie Investments also entered into a distribution agreement for a preferred series of Mackenzie mutual funds. Under this agreement, the Bank, as principal distributor, will distribute a preferred series of Mackenzie mutual funds as of the beginning of 2012.

As of October 31, 2011, with regards to these transactions, the Bank has incurred a \$7.7 million charge for termination in 2012 of the existing distribution agreement of IA Clarington funds and a \$0.5 million charge related to integration costs of the MRS Companies.
